Marketing Mzansi to South Africans

May, 2012
South African Tourism is the official tourism marketing organisation of South Africa. We market across the world focusing on three groups of travellers – international leisure travellers, domestic and regional travellers who arrive by road, business tourists who travel to South Africa for conferences and incentives and those who travel to South Africa to attend events.

A key part of our business is to:

Understand the market
Choose the attractive segments
Market the destination

This booklet has been developed as a tool to assist in the marketing of domestic tourism in South Africa. It is based on various data sources including research conducted by SA Tourism in 2011 as part of the development of a new domestic tourism marketing strategy. Based on the information available, we have developed activation plans for this market. These plans are available from our office in Johannesburg (see address on back cover).

As the information in this booklet was sourced in the development of the marketing strategy, it does not include the latest data available on the domestic market. Current information on the domestic tourism market is available on our website www.southafrica.net/research.
**Market Overview**

*South Africa is in the early stages of the tourism industry life cycle where most travel is purpose driven.*

![Tourism Industry Life Cycle Graph]

- **Introduction**
  - Uninformed, price insensitive, multi-purpose
  - Very individualized
  - Few
  - Unsophisticated, isolated, experience based
- **Growth**
  - Seek information & opportunity; discover leisure
  - Emergence of packages (seeking scale effects)
  - Emerging specialization/focus
  - Integrate products; information/choice provider
- **Maturity**
  - Very informed, price sensitive, focus on leisure
  - Specialized packages
  - High competition
  - Clear focus
  - Specialization; information provider

Country Overview

South Africa is the 26th largest economy in the world, with a GDP (PPP) of $527.5bn

Demographics (2010)

- **Area**: 1.2m square kilometres
- **Capital**: Pretoria (Administrative), Cape Town (Legislative), and Bloemfontein (Judicial)
- **Population**: 49.9 million
- **Population CAGR (2003–2010)**: 1.06%
- **Population birth rate**: 21.33 (per '000)
- **Population death rate**: 13.9 (per '000)
- **Life expectancy at birth (Male)**: 53.3 years
- **Life expectancy at birth (Female)**: 55.2 years
- **Literacy**: 89% (2007)

Key Economic Indicators (2010)

- **Currency**: Rand (ZAR), Symbol: R
- **GDP (PPP)**: $527.5bn
- **GDP per capita**: R36,730

Note: ¹ Refers to the percentage of people above 15 years who can read and write short sentences, with understanding; ² At constant prices
Economic Growth

The economy continues to grow, but not at the healthy rates experienced in the early 2000s, in part due to the global economic meltdown.

![GDP Growth Chart](chart.png)

**YoY Growth**

- **2003**: 2.9%
- **2004**: 4.6%
- **2005**: 5.3%
- **2006**: 5.6%
- **2007**: 5.6%
- **2008**: 3.6%
- **2009**: -1.7%
- **2010**: 2.8%
- **2011E**: 3.5%
- **2012E**: 3.8%
- **2013E**: 4.2%
- **2014E**: 4.4%
- **2015E**: 4.5%
- **2016E**: 4.5%

**Between 1993 and 2008, the South African economy experienced 62 quarters of uninterrupted expansion.**

**The electricity crisis and resulting loadshedding by Eskom in 2008 added to price and interest rate pressures and the global financial crisis hit South Africa, leading to the country’s first economic contraction in 17 years.**

**South Africa’s economy returned to growth in the third quarter of 2009, ending three consecutive quarters of contraction. Economists are predicting continuing growth at the 3–4% level for the next few years.**

- “Rand Strengthens after South Africa Reports End of Recession”, Garth Theunissen, Bloomberg Nov 2009
Although South Africans are better off than they were in 2003, inequality remains a concern.

</tbody>
</table>

- South Africans are enjoying higher levels of prosperity, but inequality remains high.
  - Wealthier segments of the population are experiencing income growth at a faster rate than those with lower income.
- Although inter-racial inequality is declining slowly, intra-racial inequality among Black South Africans is on the rise.

“From a policy point of view it is important to flag the fact that intra-African inequality and poverty trends increasingly dominate aggregate inequality and poverty in South Africa”

– Organisation for Economic Co-operation and Development

**GDP per capita and the gini coefficient must be considered in tandem** as the GDP per capita does not always provide an accurate picture of how wealth is distributed within a population. A **gini coefficient of 0 is representative of a completely equal society** while a **gini coefficient of 1 represents a completely unequal society**. South Africa’s Gini Coefficient is one of the highest in the world, with Brazil’s at 0.563\(^3\) and China’s at 0.415\(^3\).

Note: \(^1\) At constant 2005 prices, \(^2\) Gini coefficient calculated based on AMPS data and published in The Presidency’s Development Indicators Report, 2009; \(^3\) 2005 World Bank figures
Furthermore, South Africa was not immune to the global financial crisis, with unemployment reaching 2003 levels, and retail sales plummeting.

- After three years in decline, **unemployment rose by 8% between 2007 and 2009**, with the South African economy losing over a million jobs during the recession.
- In 2008, government **raised interest rates** in the hopes of controlling inflation, which reached a record high of 11.5%.
- As a result, **consumer spending dropped dramatically**, a clear indicator of the effects of the global financial crisis on the South African economy.

Note: 1 The labour force comprises people aged 15-64
The recovery from the global recession of 2008 to 2009 has been assisted by an increase in consumer spending

- Household expenditure increased at an annualised 5.9% in Q3 of 2010
- This increase in consumer spending is closely correlated to an increase in disposable income

Note: ¹ Constant 2005 Prices
Yet overall, the national mood is one of optimism about the future, with consumer and business confidence recovering from low levels during 2008 and 2009.

- South African business leaders are confident about the future of the country
  - 82% of South African CEOs are confident about their revenue growth prospects in 2011
  - 90% are committed to creating a skilled workforce in the country

There is an incredible sense of unity and patriotism among this generation (the youth). Their optimism about the future is also reflected in their number one career choice being to ‘open my own company’”

– Jason Levin, MD of HDI Youth Marketeers

Note: The business confidence index varies between 0 and 100. A value of 50 is indicative of neutrality, 100 indicates extreme confidence and 0 indicates extreme lack of confidence. Consumer confidence is expressed as a net balance. The net balance is derived as the percentage of respondents expecting an improvement less the percentage expecting a deterioration.

South Africa’s population has grown gradually over the last 8 years, with both the race and gender composition remaining relatively consistent.
Although South Africa’s population is still dominated by those aged 0–19, there has been a decline in that age group between 2003 and 2010, with growth in the 20–29 and 30–39 year old groups.

KEY DATA

- The average age of the population is estimated at 24.9 years
  - One of the lowest in the world (world average is 29.1 years) and lower than most large emerging economies (e.g., BRIC countries)
- With 68% of the population younger than 35 years of age, the youth has the potential to contribute strongly to economic growth in the coming years

Unsurprisingly, Gauteng is the most densely populated province in South Africa as more and more of the population urbanises.

Population Density by Province (2010)

- People per square kilometre
  - 500+
  - 100–500
  - 10–99
  - 0–9

Population density in Johannesburg is 2,194 people per square kilometre, compared with 20,925 in suburban Mumbai, 1,195 in Beijing and 5,266 in Rio de Janeiro.

- Percentage
  - 2003: 58.3% Urban, 41.7% Rural
  - 2004: 58.8% Urban, 41.2% Rural
  - 2005: 59.3% Urban, 40.7% Rural
  - 2006: 59.8% Urban, 40.2% Rural
  - 2007: 60.3% Urban, 39.7% Rural
  - 2008: 60.7% Urban, 39.3% Rural
  - 2009: 61.2% Urban, 38.8% Rural

“South Africans are consistently on the move in search of employment and a better life”

– FutureFact, 2007

From an income perspective, Black South Africans feature more prominently in middle- and high-income groups than they did in 2003.

### Household Income by Race (2003, 2010)

<table>
<thead>
<tr>
<th>Monthly H/H Income (Rand)</th>
<th>0–499</th>
<th>500–999</th>
<th>1,000–2,499</th>

<td>25.3%</td>
</tr>
</tbody>
</table>

**Unemployment Rate¹ by Race, 2003–2010**

**KEY DATA**
- Unemployment rose from 24.8% to 25.3% between 2003 and 2010
  - Interestingly, unemployment declined among Indian / Asian and Coloured population groups during this time
  - Worryingly, 51.3% of South Africans aged 15–24 are unemployed
    - If South Africa is to take advantage of its young population to spearhead economic growth, unemployment at this level must remain a key priority

“... Youths could give South Africa the competitive advantage that would see the economy emulate the economic successes of South Korea, Singapore and Japan”

– Crispin Sonn, Old Mutual

<table>

<td>12.4%</td>
</tr>
<tr>
<td>55–64</td>
<td>7.3%</td>
</tr>
</tbody>
</table>

**Unemployment Rate¹ by Age (Years), 2010²**

Note: ¹ Unemployment rate is the proportion of the labour force (those aged 15-64) that is unemployed ² Based on unrevised figures from Stats SA Source: Monitor/ Grail Analysis; “Quarterly Labour Survey”, Stats SA, for Q3 of respective years
Consumer consumption has been affected by the economic downturn, with total household expenditure dropping 4 percentage points between 2008 and 2009.

Disposable income per capita fell by 2% YoY between 2008 and 2009.

Note: 1 Disposable Income stated at constant 2005 prices; 2 Household consumption stated at constant 2005 prices
However, the composition of consumer spending has not changed dramatically. A 2010 Nielsen study showed that consumers were spending less on discretionary items such as restaurants and clothing . . .

According to the Nielsen Global Consumer Confidence Survey of Q4, 2010 consumers are displaying cautious spending patterns

- South African consumers eat less takeaway meals, have cut down on out-of-home entertainment, are spending less on new clothes, and are switching to cheaper grocery brands

Note:¹ Disposable income values at current prices with percentage change based on constant 2005 prices
 Consumption Habits & Trends

... and, despite the soaring fuel prices, consumers spent less on transport in 2009 than they did in previous years.

- South Africa is a net importer of oil and adjusts its fuel price each month to account for changes in the rand exchange rate, the international oil price and government levies.
- Consumer petrol prices reached above the R10/l mark in May 2011.

Note: ¹ Fuel price (In bond landed cost) for Petrol 93 Unleaded and Diesel (0.05% Sulphur) have been taken. We have arrived at annual average price by taking the average of the monthly average prices; ² Basic Fuel price (BFP), is based on what it would cost a South African importer to buy petrol from an international refinery and to transport the product onto South African shores; ³ Petrol prices were not classified into leaded and unleaded.

Source: Monitor/Grail Analysis; Department of Energy, Republic of South Africa; “How Fuel Prices are Calculated in South Africa”, SASOL.
Interestingly, despite a decline in the use of credit, an increasing number of consumers claim to be using credit to sustain short-term consumption such as for buying food and clothing.

**Consumer Borrowing Behaviour (2009)**

- The percentage of the population claiming not to have borrowed money in the last 12 months declined between 2008 and 2009 as consumers become more cautious about credit.
- Formal borrowing remains static, while informal borrowing, particularly from friends and family, is showing an increase.

**Top 8 Reasons for Borrowing Money (2007-2009)**

- Represents 37% of adults who claimed to borrow money.

Mobile phone usage continues to grow rapidly, with the penetration rate in 2009 ~2.5 times greater than it was in 2003.

- **4th fastest GSM market in the world** in terms of penetration growth
- **70% of the population owns a personal mobile phone**\(^1\); this figure is lower than the number of subscribers:
  - Some people in lower income communities **share handsets**
  - Many **prepaid users have a SIM card for each major network** to avoid interconnection charges
    - In 2009, one third of South African mobile phone users had more than one SIM card
- **Penetration of Smartphones is growing rapidly**: ~16% in 2011, expected to reach 80% by 2014
  - Driven by low-cost Smartphones: **2 million purchase orders for the IDEOS by Huawei** retailing at USD150

"...Cell phones have become the most easily accessible and convenient way of offering services to remote areas"

- Len Pienaar, FNB

Note: \(^1\) According to AMPS Survey 2009, \(^2\) According to a study done by Synovate and reported in an article in May 2010
The use of mobile phones is more prevalent among the younger population, with around 54% falling in the age-group 18–24 years.

**Mobile Phone Usage by Household Income**

- **No income**: 3.0% Contract, 10.0% Prepaid
- **Less than R500**: 1.8% Contract, 4.2% Prepaid
- **R501–1,500**: 1.8% Contract, 12.0% Prepaid
- **R1,501–3,000**: 10.0% Contract, 26.2% Prepaid
- **R3,001–5,000**: 21.2% Contract, 23.2% Prepaid
- **R5,001–10,000**: 24.2% Contract, 13.0% Prepaid
- **R10,000+**: 18.2% Contract, 4.0% Prepaid
- **Prefer not to say**: 20.2% Contract, 8.0% Prepaid

**Mobile Phone Usage by Gender**

- **Male**: 48%
- **Female**: 52%

**Mobile Phone Usage by Age Group**

- **13–17 years**: 21.0%
- **18–24 Years**: 54.0%
- **25–35 Years**: 21.0%
- **36–49 Years**: 3.0%
- **50+ Years**: 1.0%
**Technology Habits & Trends — Internet Usage**

*Between 2003 and 2009, internet penetration also grew steadily as South Africans increasingly use their mobile phones to access the internet*

**Internet Penetration (2003–2009)**

<table>
<thead>
<tr>
<th>Year</th>
<th>Internet Users per 100 People</th>
</tr>
</thead>
<tbody>
<tr>
<td>2003</td>
<td>7.1</td>
</tr>
<tr>
<td>2004</td>

<td>9.0</td>
</tr>
</tbody>
</table>

**KEY TRENDS**

- **Black consumers accounted for the largest share amongst internet users** with 46%, followed by Whites (37%), Coloureds (10%), and Indians (7%).
- **Increasing popularity of broadband internet:**
  - Broadband users grew by more than 50% between 2008 and 2009.
- **Mobile phones as a platform for accessing the internet:**
  - There are at least 6 million South Africans who can now access Internet on their phones.
  - 39% of urban South African mobile phone users and 27% of rural users browse the internet using their phones.
  - Amongst urban users, the mobile e-mail penetration rate increased from 10% in 2009 to 27% in 2010; for rural users the figures went from almost nil to 12%.

**Internet penetration is low compared to leading economies** (e.g., USA — 78/100 people), **but penetration is high compared to other Sub-Saharan Africa countries** (e.g., Namibia — 6/100 people).

Internet penetration is higher among the younger population of South Africa, with more than 50% of the internet users falling in the age group of 25–34 years.

Note: R Refers to monthly personal income for all household members combined, including tax; Statistics as reported in an article published in Jun 2010, from a survey conducted by Nielsen. Source: Monitor/Grail Analysis; “South African Internet Demographics”, MyBroadband, Jun 01, 2010.
In recent years, South Africans have also become increasingly engaged with social media such as Facebook, Twitter, LinkedIn and Mxit...

“Mxit was the most popular service on cell phones and was used by 24% of cell phone users, while Facebook attracted 22% of cell phone users”

– Arthur Goldstuck, World Wide Worx

- In Dec 2010, there were ~3.5 million Facebook users in South Africa
  - Growth rate of 9%
- According to Alexa, Facebook is the 2nd most popular website in South Africa after Google
- Average age of users in South Africa is 33 years

- Number of active users ~55,000
- According to Alexa, Twitter is the 7th most visited website in South Africa
- Average user in South Africa is 31 years old and lives in a major city such as Cape Town (33% of users) or Johannesburg (31.1% of users)

- Penetration rate of 29% of internet users in South Africa, making Mxit one of the country’s most popular social networking platforms
- Average age of people using Mxit is lowest amongst the social networking applications at 27 years

- According to Alexa, LinkedIn is the 11th most visited website in South Africa
- Mostly popular among people in the age group of 35–54 years
- Majority of LinkedIn users are from the Sales, Operations and Information Technology industries

Note: 1 According to a report published in 2010; 2 World Wide Worx is an organisation engaged in conducting studies on trends in information technology and telecommunications in South Africa It was the first organisation that developed benchmarks for website usability and strategy for the country

... and social media make up five out of the top 10 visited websites in South Africa as of January 2010

Note: Arrows show year on year change; \(^1\) Figures were recorded as nominal values and have been re-calculated here based on the CPI for each year to show constant 2007 prices.

Overview of Domestic Tourism

Domestic trips continued to decline in 2010 and spend was down YoY, likely due to a displacement in domestic travel required to accommodate international visitors during the World Cup.

Volume:
- ~43% of the adult population of the country travelled domestically in 2010
- Consistently, urban areas produce higher numbers of travellers who travel more and contribute to spend in a significant way.

Value:
- Annual Expenditure on Domestic Travel: R21.1bn (2010)

"Host cities like Cape Town and Durban will ‘swop’ domestic holiday business for the World Cup demand. But the regular domestic holiday business linked to school holidays will be permanently displaced, as families have no other time to travel”

- Grant Thornton Advisory Services

Note: 1 Figures were recorded as nominal values and have been re-calculated here based on the CPI for each year to show constant 2007 prices
Overview of Domestic Tourism

Since 2007, spend remains highest for VFR and Holiday trips and average spend per trip and per day have increased. In contrast, annual bed nights have decreased since 2007.

Overview of Domestic Tourism

Seasonality is driven by school holidays and warm weather, with peak months in April and January/December. KwaZulu Natal is consistently the most visited province by domestic tourists.

- South Africa’s domestic tourism market is **highly seasonal**
- The seasonality is very much **dictated by school holidays** over the Easter and Christmas periods
  - Peak months are April and December/January
- Travel appears to also be **correlated to warmer weather**, with more trips undertaken in the summer months

Seasonality — Holiday Travellers

Seasonality of holiday travel follows the same patterns of general domestic seasonality, and KwaZulu Natal remains the favoured destination; the Western Cape moves into second position.

- Holiday travel experiences two smaller peaks during April and August, but the real **high season is over December and moving into January**
- Traditional **beach destinations** such as KwaZulu Natal and the Western Cape are favoured for holiday travel
  - **Eastern Cape moves down the list**, most likely as it is a **VFR destination**

Source: Monitor/ Grail Analysis; SAT Domestic Survey 2008–2010
Seasonality — Business Travellers

Seasonality of business travel is almost opposite to that of holiday travel, with the highest peaks generally occurring in September and October. Unsurprisingly, Gauteng is the most visited destination by business travellers.

- Business travel generally drops in the months when holiday travel increases, with the highest peaks late in the year (September and October).
  - In 2010, the FIFA World Cup caused a significant dip during the months of June and July.
- Gauteng is the most visited destination by business travellers.

Source: Monitor/Grail Analysis; SAT Domestic Survey 2008–2010
Domestic Tourism — Barriers

...a number of South Africans still don’t travel domestically; most commonly because they cannot afford travel or because they felt that they had no reason to take a trip.

Reasons for Not Having Taken a Trip (2008–2010)

- Some of these barriers cannot be reduced by SAT. However, others raise key questions to investigate:
  - Cannot afford to travel: is this merely a perception about the expense of travel that SAT can work on changing, or does SAT need to investigate development of “entry-level” product that makes travel more affordable?
  - No reason to take a trip: can SAT help to create reasons to travel domestically in the form of activities, products and packages that appeal to these consumers, or will fostering a culture of travel help to reduce these numbers?
  - Dislike travelling or feel that it is not safe to travel: why is this the case and what can SAT do to change this?

Source: Monitor/Grail Analysis; SAT Domestic Survey 2010
When drilling down from the national level, it becomes clear that the financial constraints to travel are more likely to affect rural and non-metro travellers and confirming that opportunity does exist in urban and metro areas.

Top Five Reasons for Not Having Taken a Trip (2010)

- **Cannot afford travel**: National: 31%, Metro: 26%, Rural: 32%, Non-Metro: 33%
- **No reason to take a trip**: National: 20.6%, Metro: 21%, Rural: 21%, Non-Metro: 21%
- **Time constraints**: National: 18%, Metro: 21%, Rural: 23%, Non-Metro: 19%
- **Unemployed / no income**: National: 13.1%, Metro: 12%, Rural: 13%, Non-Metro: 12%
- **Dislike travelling**: National: 9.9%, Metro: 9%, Rural: 10%, Non-Metro: 9%

- Although there is still a significant percentage of travellers in urban and metro areas that feel that they are financially constrained from travelling, the numbers are slightly lower in these areas than in rural and non-metro areas.
  - This preliminary data suggests that there are **pockets of consumers in urban and metro areas in particular that can afford to travel, but face other barriers** such as time constraints or feeling as if they have no reason to take a trip.

Quantitative Research Study

A quantitative survey covering 1,716 respondents across four provinces was undertaken to understand traveller perceptions, preferences, tourism offerings, information sources, etc.

**Respondent Profile**
- **Target individuals:**
  - Are over 18 years of age
  - Have lived in South Africa for more than 10 months
    - Reside in the Western Cape, Eastern Cape, Gauteng, or KwaZulu-Natal
  - Have a personal monthly income of more than R3,000
  - Have undertaken at least 1 overnight trip in the last 12 months

**Fielding Dates**
- The survey was in the field from July 08, 2011 to July 26, 2011

**Sample Size**
- Overall sample size: 1,716
  - Western Cape: 322
  - Eastern Cape: 308
  - Gauteng: 765
  - KwaZulu-Natal: 321

**Removal of Bad Respondents**
- We have removed ‘Bad Respondents’ on the basis of contradictory responses and straight lining to exclude outliers from the overall data

Source: Monitor/Grail Analysis
Research has indicated that a trigger point for domestic holiday travel seems to exist around the R3,000 to R5,000 personal monthly income mark. This then leaves a potential target market of 8.2 million people.

The target market represents 8.2Mn South Africans, all over the age of 18 and earning a personal monthly income of R3,000 or more.

Note: ¹ 2010 figures; As per UNISA, ²~22 Mn people in SA earned less than ZAR 3,000-3,500 pm in 2010
Source: Monitor/ Grail Analysis; SAT Domestic Surveys
Understanding the market through segmentation

Using the action segmentation methodology, the available market is grouped into 14 distinct segments based on similarities in travel behaviour and preferences.

Identifying the Most Attractive Segments for Activation

Objectives of Prioritisation

A robust view to guide identification of attractive segments has been developed by measuring culture transformation and growth in each of the segments and comparing those scores against SAT’s ability to win.

**Objective 1:**
Contribute to the transformation of domestic tourism culture in South Africa

Define metrics informed by NTSS

Score each segment according to each metric...

...in order to arrive at a picture showing which of the segments are most relevant

**Objective 2:**
Increase the participation of key segments in domestic tourism in South Africa

Ability to Win scores determine the segments in which SAT has highest the potential to succeed

Combining these three views of the segments, we are able to determine which segments are most attractive for activation.

Source: Monitor/Grail Analysis
## Identifying the Most Attractive Segments for Activation

### Integrated Prioritisation

Once all three dimensions are viewed in composite, nine segments emerge as viable choices. Five segments were then chosen based on additional strategic input...

Identifying the Most Attractive Segments for Activation
Integrated Prioritisation

... Selecting the High-Life Enthusiasts, Spontaneous Budget Explorers, Seasoned Leisure Seekers, New Horizon Families and Well-to-Do Mzansi Families for active marketing activation

- Of the six segments that represented opportunities across culture transformation and growth, combined with a strong ability to win:
  - As SAT’s focus is on leisure travel, the Business Travellers segment has not been prioritised
  - Older Middle Income and Older High Income segments have been chosen as segments that SAT will work to defend
- This leaves High-Life Enthusiasts, Spontaneous Budget Explores and Seasoned Leisure Seekers

- The New Horizon Families represents a great opportunity from a culture transformation perspective, in that there are children in the families who are likely to be influenced by their parents’ growing interest in holiday travel
  - In addition, this segment is a segment in which SAT has the ability to win

- The Well-to-Do Mzansi Families and the Established Holiday Families are relevant from a growth perspective, as well as being segments in which SAT has the ability to win
  - The Well-to-Do Mzansi Families segment has been prioritised, while the Established Holiday Families segment has been chosen as a segment that SAT will work to defend
These five segments represent an opportunity to target 2.6 million South Africans; both those who had travelled in the 12 months prior to the survey and those who had not.

Prioritised segments: 2.6Mn people

Some are non-travellers: opportunity to grow the number of travellers overall

Some are already travelling: opportunity to increase spend, spread among provinces and to decrease seasonality

Note: ¹ 2010 figures; As per UNISA, ~22 Mn people in SA earn less than ZAR 3000-3500 pm in 2010

---

**Travel is a way to discover new people, places and adventures.** Consumers in this segment travel to get away from the monotony of daily life; to add to their life experiences and fond memories.

**Travel is a way to educate their children,** and to provide them with the opportunity to broaden their perspectives. It is also seen as quality time for the family to spend together, and a reward for hard work.

**Travel is a way to boost one’s social status,** and to experience the finer things in life in new and different settings.

**Travel is a way of life and something of a necessity.** Having grown up going on regular holidays, this group of consumers understands the value of travel experiences and memories over commodities.

**Travel is all about escaping the city, and being able to spend time with friends and family in new and different locations.** To a certain extent, travel is also about exposing the children to alternative ways of life and activities.

Spontaneous Budget Explorers
Travel Mindset

The combination of youth and limited responsibilities mean that the Spontaneous Budget Explorers are relatively adventurous and see the journey to a destination as part of the appeal of travelling domestically.

For Spontaneous Budget Explorers, travel is a way to discover new people, places and adventures. Consumers in this segment travel to get away from the monotony of daily life; to add to their life experiences and fond memories.

I travel because I feel a restless energy and a yearning to explore things outside of the world that I have always known. Travelling provides me with a way to have fun with my friends and gives me a chance to escape the stresses and pressure of trying to establish myself.

I go to coastal provinces like KwaZulu Natal and the Western Cape, and really enjoy city-breaks to places like Johannesburg. Destinations that are close enough for me to drive to are great, because I sometimes enjoy the trip there more than the destination itself!

I like to travel in March, April and September when there are long weekends, and always take a longer family holiday in December, but I will travel at any time during the year if I can get away from studies/work and have enough money.

When I go away, I don’t like to plan what I am going to be doing; things that are planned never really work out the way that they are supposed to! I like to spend time chilling out with friends, drinking and chatting around a braai. I love spending time in beautiful surroundings, especially on a beach. If I’m in a city, I will always check out the shopping and nightlife.

Spontaneous Budget Explorers
Who are They?

Meet Kabelo Sefoko, a typical Spontaneous Budget Explorer. Kabelo still lives at home with his parents in Kempton Park.

At 22, KB isn’t really thinking about a serious relationship and is much more interested in having fun with his friends.

KB and his friends are extremely conscious of fashion trends.

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
**Spontaneous Budget Explorers**  
**Typical Day**

*KB is working at a call centre while he finishes his studies. He gets up early every morning as he spends 1-2 hours in traffic getting to work*

*During his day at work, KB ensures that he keeps up-to-date with the news and latest happenings through Google and Facebook*

*After a long day at work, KB needs to get some studying done, so he generally doesn’t have a lot of time for social activities during the week*

---

Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
Spontaneous Budget Explorers

Typical Weekend

**Travelling for weekend getaways and taking day trips on a Saturday or Sunday are a favourite for KB’s group of friends, especially when they have just been paid.**

**Friday and Saturday evenings are spent with friends and activities are decided on spontaneously. KB and his friends enjoy going out and partying, having braais or watching movies.**

**Typical Sundays involve going to church and then spending the day relaxing at home with friends or family.**

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
The Spontaneous Budget Explorers travel primarily for holiday with friends based on information gathered via word of mouth. They look for fun experiences and like to shop when travelling.
Spontaneous Budget Explorers

Travel Behaviour

This group travels most often in December, but use long weekends in March, April and September to get around constraints such as leave available. Although budget conscious, they still spend ~R1,200 per trip

Preferred Time to Travel Domestically

Jan   Feb   Mar 8%   Apr 12%   May   Jun   Jul   Aug   Sep 11%   Oct   Nov   Dec 27%

15% of respondents said that they travel domestically all-year round and do not have a preferred time

Note: 1 Respondents were asked to estimate how much was spent in total on their most recent trip, including all expenses, such as travel, accommodation, food and beverage, entertainment, shopping, and so on; 2 The percentages for “Preferred Time to Travel” refer to percentage of responses given Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011; SAT Domestic Survey, 2007-2010
**Spontaneous Budget Explorers**

**Recent Travel Experiences**

**Most memorable aspects of recent trips**
- Spending quality time with family and friends (64%)
- Beautiful scenery (52%)
- Hospitality and friendly people (45%)
- Shopping (35%)
- Nightlife (33%)

Spontaneous Budget Explorers sighted these aspects as those that they were most satisfied with on recent trips:
- Activities (4.45)
- Natural attractions (4.41)
- Overall holiday (4.4)
- Quality of restaurants (4.37)
- Availability and variety of accommodation (4.28)

**Unpleasant experiences during recent trips**
- Nothing specific (55%)
- Expensive tourism offerings (19%)
- Poor/inadequate signage/road signs (8%)
- Unhealthy and unhygienic conditions (8%)
- Lack of tourist information centres (7%)

Spontaneous Budget Explorers sighted these aspects as those that they were least satisfied with on recent trips:
- Overall affordability (3.86)
- Affordability of car rental (3.81)
- Affordability of tourist attractions (3.71)
- Cost of air travel (3.71)
- Tour guides (3.69)

---

**Overall, consumers in this group appear to be satisfied with the quality of the product and the experiences that they have when travelling domestically. However, there is a perception that travelling, and travel-related activities, are expensive**

---

*Note: Scores in brackets are out of five*

*Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011*
More than half of the Spontaneous Budget Explorers that were surveyed are planning on taking a trip in the next 12 months, majority to coastal domestic destinations

- 59% of Spontaneous Budget Explorers say that they are planning to take a leisure trip in the next 12 months
  - The Western Cape and KwaZulu Natal were the domestic destinations mentioned most often
  - 25% of responses sighted an international destination as likely

- It is likely that domestic travel is competing primarily with categories outside of travel:
  - Student loans
  - Unexpected expenses (medical, repair of a vehicle after an accident)
  - Smart phones and other gadgets
  - Clothing and make-up

Spontaneous Budget Explorers

Recommended Messaging (1/2)

South Africa needs to be positioned as an affordable destination, where fun times can be enjoyed with friends in new and exciting places and that people are friendly wherever you go.

Communication to Spontaneous Budget Explorers must position travelling within South Africa as an affordable way to have fun in new/different surroundings, whether with existing friends or meeting new friends along the way.

Affordability should emphasise that travelling domestically offers good value for money and that, due to its intangible value, spending on travel is not comparable to spending on material items.

As a fun destination, South Africa offers the chance to socialise with friends, while exploring new parts of their own country. The message should emphasise that fun times are just around the corner at any time for the spontaneous and adventurous.

Hospitality in South Africa should be highlighted. It should be clear that a warm welcome can always be expected and that new friends can be made while travelling.

Source: Monitor/Grail Analysis
For Spontaneous Budget Explorers, this means socialising and having new and exciting experiences; for this group, the journey is just as much fun as the destination.

**Fun Times**

**SOCIALISING**

“I really like **hanging out** with friends and **meeting new people**”

**SPONTANEITY**

“The best trip will be to get on the road, take a map and just go and **see what comes your way**”

“You get **disappointed** a lot when you **plan things and they do not go according to plan**”

**ADVENTURE**

“An ideal holiday for me involves **adventure** and **getting lost**”

**ROAD TRIP**

“I **enjoy my journey** there more than the destination. **Road trips are fantastic because we do crazy things along the way**”

Source: Monitor/Grail Analysis
Spontaneous Budget Explorers

Products: What the Segment Looks For

Spontaneous Budget Explorers are looking for trips that will allow them to take part in lots of activities in new surroundings with their friends; these packages must, however, not be too prescriptive.

**WHAT KIND OF PRODUCTS DOES THIS SEGMENT LOOK FOR?**

- Spontaneous Budget Explorers are looking to stay at 2- to 3-star BnB or self-catering accommodation.
- Typically, they drive to the destination.
  - For further destinations, they may take a bus or fly on a low-cost carrier.
- They will typically pay ~R1,500 for a weekend trip.
- They take ~3 weekend trips during the year, especially over long weekends.
- They are likely to take a week-long trip in December, either with:
  - Family, in which case they are not paying for, or planning, the trip.
  - A significant other or friends.

**WHAT IS THE DESIRED OUTCOME OF PRODUCT DEVELOPMENT FOR THIS SEGMENT?**

- Products aimed at this segment should:
  - Be affordable.
  - Be activity-filled without being too prescriptive about when the activities must be done.
  - Take into account that the journey must be as enjoyable as the destination.
  - Allow them to have a space in which to socialise with their friends (e.g., a communal outdoor area).
  - Take into account their propensity for spontaneity and adventure.

79% of Spontaneous Budget Explorers prefer a weekend holiday filled with activities compared to a quiet weekend getaway.

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011
Spontaneous Budget Explorers consult a range of media to gather information. They prefer to source travel information via word of mouth, and are most interested in information about activities at the destination.

### Primary Source of Information

- **Word of Mouth**: 33%
- **Online**: 19%
- **Radio**: 12%
- **Television**: 9%
- **Social Networking Sites**: 5%
- **Brochure**: 5%

### Sources Most Trusted to Provide Reliable Information

- Travel Agent: 4.6
- Online: 4.4
- Television: 4.3
- Tourist Info. Centre: 4.3
- Word of Mouth: 4.3

### Topics on Which Information is Gathered

- Things To Do: 45%

Activities at the destination are important to Spontaneous Budget Explorers. They gather a lot of information on what to do and how much it will cost.
Spontaneous Budget Explorers
Media Channels Used (2/2)

In general, Spontaneous Budget Explorers can be reached via younger, urban radio stations, although vernacular language stations are also an option.

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011
Spontaneous Budget Explorers mostly book directly with the product owner, but they do also use Computicket and travel agents.

- Spontaneous Budget Explorers mostly book directly with the product owner.
- They use Computicket, which can be leveraged for event-driven packages as well as bus tickets for road trips.
- This group also uses travel agents and tour operators for their domestic travels.
  - These channels can be useful in allowing for payments for relevant packages without the use of credit cards, as well as to provide first-time travellers with advice and assistance.

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011
Consumers in this segment are generally older and married with dependent children. They work hard to provide for their families on limited income and are constantly trying to ensure a better future for their children.

- Average Age: 44 years
- 51% Male, 49% Female
- 33% Single, 42% Married/Living Together, 14% Divorced/Widowed/Separated

New Horizon Families
Travel Mindset

Travel is one of the ways in which New Horizon Families invest in their children, believing that exposure to different people and places is important. In addition, a holiday is an opportunity to relax at the end of a hard year.

For New Horizon Families, travel is a way to educate their children about the world, and to provide them with the opportunity to broaden their perspectives. It is also seen as quality time for the family to spend together, and a great reward for hard work.

I travel because I feel that I need to give my children an opportunity to experience more of the world than what is in their backyard. I want to give my children the opportunity to see places that I never did as a child. I also think that we deserve a break at the end of the year; we work so hard that we would go mad without a little relaxation.

I go to places where I have friends or family to visit. Generally, I end up in places like KwaZulu Natal, Gauteng and the Eastern Cape. Because of the beaches, KwaZulu Natal and the Eastern Cape are great for the kids too.

We generally end up travelling as a family over the school holidays in December, although we don’t do a big trip in December every year. Sometimes we will take shorter trips in April or September.

When on holiday, I like to spend time with my family and friends, socialising and doing things that are different from what I can do at home, seeing sights like Robben Island and going up the cable car in Cape Town. I also like to do some shopping and the kids really enjoy being at the beach.

I would travel more if I had the time and the money to do so. I really think that travel is important and would go more often if I could, but I already have to save just so that I can take my family on one big trip a year.

Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011
New Horizon Families
Who are They?

Meet Nadira Mayet, a typical New Horizon Family consumer

Nadira works as a clerk at a bank, which allows her to contribute to the household income

Nadira is 38 years old and is married with two children

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
New Horizon Families

Typical Day

Nadira makes sure that the children get going for school and then makes her way to work.

After a long day at work, she comes home and makes dinner for her family.

"I regularly watch TV travel programs or documentaries"

<table>
<thead>

</table>

After dinner, Nadira likes to relax and watch TV. She likes to keep abreast of what’s happening in the country, and regularly watches TV travel programs like Top Billing.

Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
Weekends are reserved for spending time with family, often watching sport on TV as Nadira’s husband sees Saturdays as “sports” days.

Nadira’s family often has friends around for a braai as it is a great way to socialise without spending a fortune.

On Sundays, the family goes to church and sometimes enjoys a picnic or visit to a park.

Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
New Horizon Families primarily travel for VFR and seek to enjoy family time; they enjoy social activities and shopping when on a trip.
Generally, New Horizon Families take ~3 trips per year at times dictated by school holidays and stay for 5 nights. Despite their lower income, they tend to spend decently on trips, as they save specifically for travel.

- Length of Stay: 5.2 nights
- No. of Trips per Year: 3.1
- Average Spend per Trip\(^\d\): R1,160.50

**Drivers of Length of Stay**

- Leave: 34%
- Friends/Family at Destination: 34%
- Long Weekends: 28%
- Activities at Destination: 22%
- School Holidays: 22%

**Preferred Time to Travel Domestically**

- Jan: 9%
- Feb: 13%
- Mar: 9%
- Apr: 9%
- May: 13%
- Jun: 9%
- Jul: 11%
- Aug: 11%
- Sep: 26%
- Oct: 22%
- Nov: 22%
- Dec: 26%

School holidays are typically in June and December/January, with shorter breaks over Easter and in September. This coincides with the preferred time to travel. 35% of responses from New Horizon Families show a preference to travel during main school holidays in December/January.

Note: 1 Respondents were asked to estimate how much was spent in total on their most recent trip, including all expenses, such as travel, accommodation, food and beverage, entertainment, shopping, and so on; 2 The percentages for “Preferred Time to Travel” refer to percentage of responses given Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011; SAT Domestic Survey, 2007-2010
New Horizon Families
Recent Travel Experiences

Most memorable aspects of recent trips
- Beautiful scenery (50%)
- Spending quality time with family/ friends (48%)
- Hospitality and friendly people (42%)
- Shopping (34%)
- Beaches (20%)

New Horizon Families sighted these aspects as those that they were most satisfied with on recent trips:
- Overall holiday (4.51)
- Natural attractions (4.32)
- Activities (4.32)
- Quality of restaurants (4.30)
- Ease of reaching destination (4.23)

Unpleasant experiences during recent trips
- Nothing specific (65%)
- Expensive tourism offerings (11%)
- Poor/ inadequate signage/ road signs (8%)
- Lack of tourist information centres (7%)
- Lack of general infrastructure (7%)
- Inadequate public transport facilities (7%)

New Horizon Families sighted these aspects as those that they were least satisfied with on recent trips:
- Tour guides (3.83)
- Affordability of car rental services (3.83)
- Information centre/ tourism offices (3.81)
- Affordability of tourist attractions (3.76)
- Cost of air travel (3.53)

Consumers in this segment appear to be satisfied with the overall experience of their domestic holidays and have minor gripes about affordability. However, they would like more information and better sources of information because they are concerned with the exposure and educational aspect of travel.

Note: Scores in brackets are out of five
Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011
New Horizon Families
Competitors to Domestic Travel

Half of New Horizon Families are planning to take a trip in the next 12 months, once again to mostly coastal destinations domestically.

Planning to Take a Leisure Trip in Next 12 Months

- 50% of New Horizon Families say that they are planning to take a leisure trip in the next 12 months
  - The Western Cape and KwaZulu Natal are the most likely domestic destinations
  - 22% of responses sighted an international destination as likely; however, it is likely that these are aspirational rather than truly possible due to the income of this segment

Most Likely Destination to Visit in Next 12 Months

- It is likely that domestic travel competes with things that New Horizon Families feel are beneficial to their children:
  - Children's education (school fees, uniforms, books)
- However, because this segment believes that travel has an educational aspect, they will always save for it, rather than for commodities like a TV

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011

Copyright © 2012 SA Tourism
South Africa needs to be positioned as a destination that allows you to spend quality time with your family, provides invaluable exposure to your children through new experiences, and rewards you for all your hard work.

Communications to New Horizon Families must position travelling within South Africa as an accessible way to broaden their children’s horizons, while spending quality time as a family and rewarding themselves for their hard work in providing for, and looking after, their family.

Travelling in South Africa with family offers the chance to spend time together outside of the hustle and bustle of everyday life. The message should emphasise the value of spending quality time with family away from normal surroundings.

It is important to ensure that children have a chance to broaden their horizons and learn about their country. Highlight that travelling in South Africa with children provides them with essential exposure that they can only gain through experiencing different places.

The relaxing and rewarding element of travel within South Africa should be highlighted. Show that after putting in a lot of hard work for the sake of family, taking a break is a well-deserved treat.

Source: Monitor/Grail Analysis
For New Horizon Families, this means relaxing with family in beautiful surroundings, while learning a lot and being exposed to things that they wouldn’t be exposed to if they stayed at home.

**Relaxing Family Time**

“I travel because I feel that I need to give my children an opportunity to **experience more of the world than what is in their backyard**”

“Travelling is a **necessity when you have children**. You have to take them places so that they don’t just see animals or Table Mountain on TV, but they **see for themselves**”

“**Holiday is important for relaxation purposes**. Since we **worked very hard** we need to just go and relax. We need a break; it is a way to **revitalise ourselves and refresh**”

**Source:** Monitor/ Grail Analysis
New Horizon Families want affordable and accessible holidays for their families. Information on culture, heritage and nature in an area are a critical part of products aimed at this segment.

**WHAT KIND OF PRODUCTS DOES THIS SEGMENT LOOK FOR?**

- New Horizon Families are looking to stay at 3-star BnB or self-catering accommodation
- They will **drive or take a bus** to their destination
- They will typically **pay ~R10,000 for a 10-day** trip with 2 adults and 2 children
- They may take weekend-long family trips during the year in self-catering accommodation or at camp sites
- This segment saves up for a **big family holiday** during the December school break
  - This big trip is typically taken every 2\textsuperscript{nd} or 3\textsuperscript{rd} year

**WHAT IS THE DESIRED OUTCOME OF PRODUCT DEVELOPMENT FOR THIS SEGMENT?**

- Products aimed at this segment should:
  - Be affordable
  - Be accessible by road
  - Be **child-friendly**, both in terms of facilities and activities
  - Offer access to cultural/ nature/ heritage activities
  - Include information; **information centres and/or tour guides** are critical for this group, as they want to learn new things while travelling

“**A lack of information about a place deters me from travelling to it. I want to go to Durban because I've heard of uShaka Marine World but if there was no information on it, I wouldn't go there**”

Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011
New Horizon Families prefer word of mouth and television to source travel information, and find both sources quite reliable. They are mostly interested in gathering information on accommodation.

Primary Source of Information

High-Life Enthusiasts
Travel Mindset

High-Life Enthusiasts expect travel to fit into their lives seamlessly and enjoy doing the same things when they are travelling that they do when they are in their city of residence.

For High-Life Enthusiasts, travel is a way to boost one’s social status, and to experience the finer things in life in new and different settings.

I travel because the places I have been to (cities, restaurants, nightclubs, events) tell other people who I am. I like to experience what other places have to offer and be able to tell great stories to my friends and family back at home.

I would travel more if I really felt like a holiday was a better way to spend money than on designer clothes or a new car.

I go to different places depending on what I am looking for from a holiday. KwaZulu Natal and the Western Cape are great because of the combination of beaches and city-activities, but I also go to the Eastern Cape occasionally to visit family and have a more relaxed time.

I generally travel in December, June and September, although April, January and October are also desirable months to travel, if I can manage to take leave.

Holidays must provide me with a real wide range of activities. First and foremost, I want to be able to see friends and enjoy activities with them. Some days while travelling I want to be on a boat ride in the morning and at a club in the evening, while other days I want to be able to go shopping and eat at a nice restaurant for lunch and then drink and have a bonfire on the beach in the evening.

High-Life Enthusiasts

Who are They?

Meet Palesa Moloi, a typical 29 year old High-Life Enthusiast

She is currently an associate at a reputable law firm

Palesa is single and lives in a trendy new penthouse in Braamfontein

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
High-Life Enthusiasts

Typical Day

Palesa drives to work early everyday and picks up a coffee at the garage on her way in.

She has a hectic day at work, trying to impress the partners at her firm.

Palesa’s evenings are often spent socialising with friends: having cocktails and eating out are favourite pastimes.

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
High-Life Enthusiasts

Typical Weekend

On weekends, Palesa likes to pamper herself with a manicure or having her hair done...

...and often spends Saturday afternoons engaging in some retail therapy

Friday and Saturday nights are spent socialising with friends

Sundays are often spent with friends and family relaxing and chatting over a long lunch

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
This group generally travels on holiday with friends or their partner and really look to experience fun times with family and friends. High-Life Enthusiasts enjoy relaxing and doing city-based activities with others.
Despite their relatively high income, High-Life Enthusiasts do not appear to be prepared to spend significantly on travel and choose shorter stays to keep their travel budget in check, and due to their ability to take time away from work.

**Drivers of Length of Stay**

- Length of Stay: 4.5 nights
- Leave: 57%
- Travel Budget: 35%
- Long Weekend: 35%
- Friends/Family: 27%
- School Holidays: 24%

**Preferred Time to Travel Domestically**

- Jan: 7%
- Feb: 8%
- Mar: 15%
- Apr: 14%
- May: 7%
- Jun: 25%
- Jul: 25%
- Aug: 25%
- Sep: 14%
- Oct: 7%
- Nov: 7%
- Dec: 25%

**Note:**

1. Respondents were asked to estimate how much was spent in total on their most recent trip, including all expenses, such as travel, accommodation, food and beverage, entertainment, shopping, and so on.
2. The percentages for “Preferred Time to Travel” refer to percentage of responses given.

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011; SAT Domestic Survey, 2007-2010
### Most memorable aspects of recent trips
- Spending quality time with family and friends (68%)
- Beautiful scenery (65%)
- Shopping (43%)
- Beaches (38%)
- Fun and adventure activities (27%)
- Nightlife (27%)

**High-Life Enthusiasts sighted these aspects as those that they were most satisfied with on recent trips:**
- Overall holiday (4.51)
- Natural attractions (4.41)
- Quality of restaurants (4.28)
- Quality of accommodation (4.26)

### Unpleasant experiences during recent trips
- Nothing specific (54%)
- Expensive tourism offerings (16%)
- Lack of tourist information centres (11%)
- Poor/ inadequate signage/ road signs (8%)
- Poor quality of service at restaurants, hotels, etc. (8%)

**High-Life Enthusiasts sighted these aspects as those that they were least satisfied with on recent trips:**
- Local public transport (3.63)
- Affordability of car rental (3.55)
- Tour guides (3.53)
- Information centre/ tourism offices (3.52)
- Cost of air travel (3.31)

---

**Consumers in this group are especially satisfied with beautiful scenery and spending time with friends and family. However, there is a perception that service levels are not satisfactory and that it is often difficult or expensive to get around. These consumers want to move freely and be treated as well as they are in their favourite places in their cities of residence**
59% of High-Life Enthusiasts are planning on taking a trip in the next 12 months; however, international and regional destinations are a major competitor to domestic travel in this segment.

- 59% of High-Life Enthusiasts say that they are planning to take a leisure trip in the next 12 months.
- 36% of responses sighted an international destination as likely.
  - Consumers in this segment feel that international and regional destinations are much better indicators of status than domestic travel.
  - Regional destinations like Swaziland, Lesotho, Botswana, Mozambique, and Mauritius are particularly popular amongst this segment.
  - International destinations mentioned included the UK, USA, and Switzerland.

- Apart from competition from regional and international destinations, in this segment, travel competes with status and lifestyle items:
  - Designer clothing
  - A trendy apartment
  - A car

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011
South Africa needs to be positioned as a destination where invaluable and enviable experiences can be enjoyed with utmost ease and convenience.

Communications to High-Life Enthusiasts must position domestic travel as the quickest and easiest way to enjoy invaluable and enviable world-class (but home-grown) experiences.

Invaluable and enviable refers to the intangible and irreplaceable experiences to be gained from travel, and that memories from these experiences in exotic and exclusive places are made to be shared with friends and significant others; whether they travelled with you or they just wish that they could have.

World-class experiences should highlight the quality and variety of experiences on offer in South Africa, from the world’s top restaurants in Franschoek to the highest commercially operated bungee jump in the world at Bloukrans. It should also be clear that these world-class experiences are home-grown and something to be proud of as a true African.

Quickest and easiest should focus on the ease and comfort of jumping on a plane or in a car and seeing South Africa, and the way that it can fit a busy lifestyle without too much planning, and without having to compromise standards of style and comfort.

Source: Monitor/Grail Analysis
For High-Life Enthusiasts, this means having world-class experiences on their doorstep

Invaluable and Enviable World-Class Experiences

**QUALITY**

“I’m used to nice things in my life, why should I settle for less when I travel”

**VARIETY**

“I want to be able to wake up and decide what to do and then do it. No matter where I am, I want to have options”

“My favourite type of trip is where I can go on a boat cruise in the afternoon, spend the evening at a great restaurant and then hit the clubs. Maybe the next day I’ll be shopping or relaxing in the spa”

**ENVIABILITY**

“I always Tweet or post what I’m doing to Facebook so that my friends get a glimpse into what I’m doing, where I’m staying…”

Some illustrative examples

Source: Monitor/Grail Analysis
High-Life Enthusiasts

Products: What the Segment Looks For

High-Life Enthusiasts want glamour and comfort from their holidays. They want to be seen enjoying places South Africa has to offer.

**WHAT KIND OF PRODUCTS DOES THIS SEGMENT LOOK FOR?**

- High-Life Enthusiasts are looking to stay at 4- to 5-star accommodation
- They drive to destinations close by and fly to further destinations
  - They are likely to hire a car if they fly somewhere, but aren't impressed having to drive a car that is less luxurious than what they drive at home
- They consider between R600 and R1,200 per person per night sharing as reasonable for a 4-star BnB
- They take a couple of weekend breakaway trips during the year
- Longer trips are usually taken in December with friends
  - It is easier to co-ordinate leave when everyone takes time off

**WHAT IS THE DESIRED OUTCOME OF PRODUCT DEVELOPMENT FOR THIS SEGMENT?**

- Products aimed at this segment should:
  - Be perceived as value for money, but not cheap
  - Be glamorous and/or offer comfort: holidays must be the best that South Africa has to offer
  - Have the option for numerous activities, but allow the consumer to choose to do activities as and when they please
  - Offer convenience: one price for everything is attractive to this group, as it allows them to plan their spending ahead of time and then not have to worry about budgeting once they are at the destination

78% of High Life Enthusiasts prefer a weekend holiday filled with activities compared to a quiet weekend getaway

Seasoned Leisure Seekers

Travel Mindset

Having grown up taking regular family holidays, travel for this group is really all about “getting away”. These travellers often go to the same places and are not particularly adventurous when choosing domestic destinations.

For Seasoned Leisure Seekers, travel is a way of life and something of a necessity. Having grown up going on regular holidays, this group of consumers understands the value of travel experiences and memories over commodities.

I travel because it is a way of life for me and those around me. I don’t even really think about why anymore as it is such a natural thing to do, but I know that travelling gives me the opportunity to get away from the pressures of city life and to build new memories that I will cherish forever.

I would travel more if I could find the time to get away from work, although I do take every opportunity to have a weekend away, even if it is just to get two hours away from the city.

I go to coastal destinations like the Western Cape, KwaZulu Natal and the Eastern Cape, often because my family has a holiday home.

I tend to travel whenever it suits me, but, no matter when I travel during the year, I will always do a trip in December.

When I travel domestically, I do it to be able to spend quality time with my loved ones. I want to be able to relax in a different and beautiful environment and not be bothered with the hectic pace of life in the city. I am very happy relaxing and reading, or taking walks in nature, but I don’t necessarily want to be in a completely sleepy town where I can’t do a bit of exploring or shopping for things like crafts or fresh produce. When I’m somewhere like Cape Town or Durban, I will definitely explore the nightlife and go out with my friends.

Seasoned Leisure Seekers

Who are They?

Meet Georgie Stevens, a typical Seasoned Leisure Seeker

Georgie is 32 years old and has been in a relationship for a couple of years, but has no kids

She works as a marketing manager for a well-known South African brand

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
Seasoned Leisure Seekers

Typical Day

Georgie goes to gym every morning before work. She likes to make sure that she exercises every day.

At work, she attends meetings and spends a lot of time surfing the net, spending time on Google and Facebook.

Georgie likes to relax in the evenings with her boyfriend and eats out with friends about once a week.

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
Seasoned Leisure Seekers

Typical Weekend

On weekends, Georgie likes to travel to her family holiday home 2 hours away...

...She likes being in a different environment and getting away from the buzz of the city

When Georgie and her boyfriend don’t go away for the weekend, they tend to spend their weekends shopping for crafts and specialty produce and spending time with friends.

Seasoned Leisure Seekers

Buying Process

Seasoned Leisure Seekers are firmly holiday travellers, and travel with their spouse to escape and relax.
Seasoned Leisure Seekers take more trips and stay longer than any of the other prioritised segments. They are less seasonally bound and spend significantly when they do travel.

Length of Stay: 7.7 nights

Drivers of Length of Stay

- Leave: 53%
- Friends/Family at Destination: 40%
- Travel Budget: 38%
- Long Weekends: 25%
- Activities at Destination: 21%

Average Spend per Trip\(^1\): R1,853.40

No. of Trips per Year: 4.4

Preferred Time to Travel Domestically\(^2\)

- Jan 9%
- Feb
- Mar
- Apr 9%
- May
- Jun
- Jul
- Aug
- Sep 9%
- Oct
- Nov
- Dec 21%

16% of respondents said that they would travel domestically all-year round.

Note:  \(^1\) Respondents were asked to estimate how much was spent in total on their most recent trip, including all expenses, such as travel, accommodation, food and beverage, entertainment, shopping, and so on; \(^2\) The percentages for “Preferred Time to Travel” refer to percentage of responses given.

Seasoned Leisure Seekers
Recent Travel Experiences

Most memorable aspects of recent trips

- Beautiful scenery (65%)
- Beaches (47%)
  - Spending quality time with family and friends (47%)
- Hospitality and friendly people (40%)
- Good service at hotels, airports, etc. (31%)

Seasoned Leisure Seekers sighted these aspects as those that they were most satisfied with on recent trips:

- Natural attractions (4.63)
  - Overall holiday (4.51)
  - Cultural, historical, and heritage sites (4.47)
  - Availability and variety of accommodation (4.42)
  - Quality of accommodation (4.41)

Unpleasant experiences during recent trips

- Nothing specific (69%)
- Expensive tourism offerings (11%)
- Poor/ inadequate signage/ road signs (9%)
- Lack of general infrastructure e.g. rail, road, etc. (6%)
- Lack of tourist information centres (4%)
- I was a victim of theft/ robbery/ crime/ violence (4%)

Seasoned Leisure Seekers sighted these aspects as those that they were least satisfied with on recent trips:

- Tourist information when planning trip (3.9)
- Tour guides (3.9)
- Service quality provided in flights (3.89)
- Affordability of tourist attractions (3.83)
- Local public transport (3.62)
- Cost of air travel (3.5)

Consumers in this group appear to be most satisfied with the scenery and natural attractions on offer during their domestic travels. They are, however, concerned by a lack of information while planning their trips and during their travels; having travelled often, these consumers require more nuanced and specific information than first-time or unseasoned travellers.

Note: Scores in brackets are out of five
Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011
57% of Seasoned Leisure Seekers said that they were not planning to take a leisure trip in the next 12 months, something that possibly points to the effects of the recession.

- 43% of Seasoned Leisure Seekers say that they are planning to take a leisure trip in the next 12 months.
  - Majority noted that coastal destinations in the Cape and KwaZulu Natal are likely destinations.
  - 22% of responses sighted an international destination as likely.

- In this group, international and regional destinations are competitors to domestic travel, but travel also competes with spending on other discretionary items, more so now than prior to the recession:
  - Large investments (share portfolio, property etc.)
  - Gadgets (new TV, iPad)
  - Jewellery
  - Hobbies (e.g. mountain biking, horse-riding, photography)

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011
South Africa needs to be positioned as a unique and beautiful destination that always has something new to discover and explore with loved ones.

For Seasoned Leisure Seekers, the message needs to focus on the different places and ways that South Africa has to offer so that they can escape, relax and spend quality time with loved ones.

Different places should focus on all of the unique and beautiful places that South Africa has to offer and show that there is always somewhere new to discover. The message should encourage Seasoned Leisure seekers to explore new places instead of repeatedly taking holidays at the same destination.

Escape and relax refers to getting away from the pace of the city and being able to do very little, except explore the surroundings.

Spend quality time with loved ones is all about Seasoned Leisure Seekers having the time and space to enjoy the company of the people that they love. In addition, it is about sharing special memories with special people.

Source: Monitor/Grail Analysis
For Seasoned Leisure Seekers, this means escaping and relaxing in beautiful, and memorable, surroundings, where they have the option to do nothing or to explore something new.

- **MEMORABLE**
  
  “You have to be able to remember where you have been; if it’s not memorable, there is no point.”

- **QUALITY TIME WITH LOVED ONES**
  
  “For me, something that is always important when I go somewhere is the people I am with.”

- **NATURAL BEAUTY**
  
  “At the same time, you want beautiful scenery. It doesn’t have to be a beach. It can be inland. Like nice mountain views and stuff”

- **BALANCE**
  
  “I am someone who lazes around and reads a book, but I don’t want to be totally bored”
Seasoned Leisure Seekers want products that may not necessarily be mainstream and popular, but allow them a chance to explore the culture, food and wine, and sceneries of different places within South Africa.

WHAT KIND OF PRODUCTS DOES THIS SEGMENT LOOK FOR?

- Seasoned Leisure Seekers are looking to stay at 3- to 5-star BnB or self-catering accommodation
- They will drive to destinations close by, and fly to further destinations
- They feel that between R800 and R1,400 is a reasonable price to pay per person per night sharing for a 4-star BnB
- They take 3 or 4 weekend breaks during the year
  - If they have a holiday home, they may take more frequent weekend breaks
- 10 days in December are usually spent with family at a holiday home, or on an overseas break, but this group generally travels throughout the year and are not limited to peak periods

WHAT IS THE DESIRED OUTCOME OF PRODUCT DEVELOPMENT FOR THIS SEGMENT?

- Products aimed at this segment should:
  - Be perceived as value for money
  - Not necessarily be mainstream or traditionally popular; this group enjoys special interest activities and hobbies
  - Incorporate something different and memorable, such as beautiful scenery or local culture and crafts
  - Include information on local activities and festivals, food and wine, and scenery

“I like festivals like the Robertson Wine Festival and the Knysna Oyster Festival. Things like that promote the place and give me a reason to go there”

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011
Seasoned Leisure Seekers use mostly word of mouth as a travel information source and are mostly interested in finding out about places where they can stay.

### Sources Most Trusted to Provide Reliable Information

- 96% Working Full Time
- 3% Working Part Time

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011
For Well-to-Do Mzansi Families, travel is all about escaping the city, and being able to spend time with friends and family in new and different locations. To a certain extent, travel is also about exposing the children to alternative ways of life and activities.

I travel because I enjoy taking my life and moving it to a new location every now and then. Getting away from the pressures of work and city-life so that I can spend time with my spouse and kids is really important. Sometimes I also need time away from my spouse and kids though, which makes a drinking weekend away with buddies a great option!

I would travel more if I could get more time away from work. Doing business often gets in the way of trips that I have planned because I am the breadwinner and I just can’t put my business deals on hold to go away and relax.

I go to a wide range of destinations depending on what I want to do. KwaZulu Natal and the Eastern Cape allow me to visit family and go to the beach with my kids, while the Western Cape and Gauteng are best for city-breaks with friends or my spouse.

I travel mostly during my kids’ school holidays, with a family holiday in December being a favourite time for all of us.

When on holiday, I like to spend time with my friends and family relaxing, shopping and socialising. This could mean anything from drinking around a braai, to taking the kids out on a hike up in the Drakensburg, to shopping for clothing with my wife. I don’t like my days to be too planned out in advance when I’m on holiday, I like to be able to decide what I want to do when I wake up and then get out there and do it.

Well-to-Do Mzansi Families
Who are They?

Meet Bongani Khumalo, a typical Well-to-Do Mzansi Family consumer

Bongani is 37 years old and married with two children

Bongani is an entrepreneur running a number of successful enterprises

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
Well-to-Do Mzansi Families

Typical Day

Most of Bongani’s time during the week is spent at work. He is always rushing from meeting to meeting and often needs to travel to meet potential clients in other cities.

In the evenings from Monday to Wednesday, he often meets with potential clients or partners for business dinners.

Thursday and Friday evenings are often spent eating out with friends.

Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
Well-to-Do Mzansi Families

Typical Weekend

Bongani balances his time on weekends between activities with his family and his friends. Saturdays are generally family days, whilst Sundays are often taken up with business lunches or a game of golf.

Bongani and his family often go away on weekends to their holiday home in Zimbali.

They go away to enjoy some peace and quiet away from the city and spend the weekend socialising, eating and drinking together.

Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011; Primary Research
Well-to-Do Mzansi Families travel mostly for holiday with their families or spouses and look to relax, socialise and do some shopping.
Well-to-Do Mzansi Families
Travel Behaviour

Travellers in this segment take ~3 trips per year and tend to travel during school holidays. They stay on average just over 5 nights, although this is less driven by budget than other segments, and primarily due to work pressures.

Average Spend per Trip\(^1\) : R1, 687.80

No. of Trips per Year: 3.2

Preferred Time to Travel Domestically\(^2\)

School holidays are typically in June and December/ January, with shorter breaks over Easter and in September. This coincides with the preferred time to travel. 40% of responses from Well-to-Do Mzansi Families show a preference to travel during main school holidays in December/ January.

Note: \(^1\) Respondents were asked to estimate how much was spent in total on their most recent trip, including all expenses, such as travel, accommodation, food and beverage, entertainment, shopping, and so on; \(^2\) The percentages for “Preferred Time to Travel” refer to percentage of responses given
Source: Monitor/ Grail Analysis; Domestic Segmentation Quantitative Survey 2011; SAT Domestic Survey, 2007- 2010
### Most memorable aspects of recent trips
- Spending quality time with family/friends (57%)
- Beautiful scenery (55%)
- Hospitality and friendly people (38%)
- Shopping (38%)
- Beaches (32%)

*Well-to-Do Mzansi Families sighted these aspects as those that they were most satisfied with on recent trips:*
- Overall satisfaction of the holiday (4.45)
- Natural attractions (4.35)
- Ease of reaching destination (4.34)
- Quality of accommodation (4.25)
- Activities (4.25)

### Unpleasant experiences during recent trips
- Nothing specific (52%)
- Expensive tourism offerings (22%)
- Lack of tourist information centres (9%)
- Lack of general infrastructure (9%)
- Poor/inadequate signage/road signs (8%)

*Well-to-Do Mzansi Families sighted these aspects as those that they were least satisfied with on recent trips:*
- Information centre/tourism offices (3.74)
- Local public transport (3.70)
- Affordability of car rental services (3.66)
- Cost of air travel (3.56)
- Tour guides (3.54)

---

*Well-to-Do Mzansi Families appear to be satisfied with the overall experience of their domestic holidays, but especially with natural attractions and scenery. They find infrastructure, information and signage inadequate and, despite their high income, feel that tourism offerings are expensive and that, even if you can afford high prices, there still needs to be a sense of value for money.*

- 59% of Well-to-Do Mzansi Families say that they are planning to take a leisure trip in the next 12 months
  - Most popular destinations include the Western Cape and KwaZulu Natal, while Mpumalanga is relatively high for this segment when compared with others
  - Only 9% of responses sighted an international destination as likely
- In this segment, the biggest reason for not travelling is not having the time; although an international trip may compete for disposable income, domestic trips are generally affordable for consumers in this segment

Well-to-Do Mzansi Families

Recommended Messaging (1/2)

South Africa needs to be positioned as a destination that will allow Well-to-Do Mzansi Families to disengage from daily work pressures and the pressures of city life, while reconnecting with family or friends.

Communications to Well-to-Do Mzansi Families must position travelling within South Africa as a great way to break away from daily pressures, whether relaxing with family or having good times with friends.

The importance of disengaging from business/ work pressures and city life through travelling domestically should be highlighted. It is important to show that breaking away every now and again is a fantastic way to recharge batteries so that they can perform at their best.

Travelling to new places within South Africa with family should be shown as the best way to spend quality family time together. It is the only time that daily pressures can be completely left behind and true connections forged.

Travelling domestically with friends is an affordable way to make sure that everyone connects and has fun together, while away from normal surroundings.

Source: Monitor/ Grail Analysis
For Well-to-Do Mzansi Families, this means being isolated, with friends and family, in comfortable surroundings.

**Breaking Away from Pressures**

**ISOLATION**

“The further away I am from any kind of signal the better. I don’t want to be disturbed by the outside world when I’m on holiday.”

“Holiday time with my kids is non-negotiable. I block that weekend off and don’t take any business calls.”

**SOCIALISING**

“Sometimes you just need to get away with the guys, and have a raucous boys’ weekend.”

**COMFORT**

“I don’t want to have to settle for less when I travel. A plush executive apartment or 5 star BnB will do for me.”

Well-to-Do Mzansi Families

Products: What the Segment Looks For

Well-to-Do Mzansi Families want products that are comfortable and hassle free, with a variety and abundance of activities and entertainment

WHAT KIND OF PRODUCTS DOES THIS SEGMENT LOOK FOR?

- Well-to-Do Mzansi Families are looking to stay at 4- to 5-star accommodation
- They drive or fly, depending on how close the destination is
- They feel that R1,000 to R1,700 per person per night sharing is a reasonable rate for a 4-star BnB
- They take numerous weekend breaks during the year, depending on how much time they have
  - Children are not always taken on breakaways, as they feel comfortable leaving their children with nannies or grandparents for a night or two
- Longer trips are likely to be family trips to a holiday home or overseas and can last for a week or two

WHAT IS THE DESIRED OUTCOME OF PRODUCT DEVELOPMENT FOR THIS SEGMENT?

- Products aimed at this segment should:
  - Be perceived as value for money; although this segment is wealthy, they do not like feeling as if they have been over-charged
  - Be hassle free; paying one price upfront for everything is appealing to this group
  - Be child-friendly in terms of facilities and entertainment available
  - Be comfortable and luxurious
  - Offer activities, without being too prescriptive

“I don't want to have to constantly pull out my credit card once I'm there. If I can be given one price for everything and that's it, I'll be really happy”

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011
Word of mouth is the most commonly used source of information, closely followed by online. This group usually searches for information related to accommodation and weather at the destination.

Well-to-Do Mzansi Families
Media Channels Used (2/2)

Media are shown in order of importance as primary sources of information for the segment from left to right.

Source: Monitor/Grail Analysis; Domestic Segmentation Quantitative Survey 2011
Well-to-Do Mzansi Families mostly book with the product owner, but an opportunity exists to build the travel agent channel as this segment is willing to pay a little bit more to take the hassle out of booking a holiday.

- Well-to-Do Mzansi Families mostly book directly with the product owner.
- They currently use travel agents and travel websites, but the use of these channels should be further encouraged to minimise the time and hassle involved in booking a holiday.

Table of Contents

- Country Overview
- Domestic Tourism Market
- Understanding the South African Domestic Tourist Population
  - Researching and Segmenting the Population
  - Identifying the Most Attractive Segments for Activation
  - Understanding More About the Most Attractive Segments
- High-level Roadmap for reaching the NTSS targets
Although five segments emerged as most attractive for activation, it is important to build the activation strategies around the combination of consumer segments that will give SAT the greatest opportunity to reach its targets.

An analysis has been run to show the CAGR required to achieve the above targets across three different scenarios:

**Scenario 1**
Only the five most attractive segments are activated to reach the targets.

**Scenario 2**
All 14 segments on the segmentation frame are activated to reach the targets.

**Scenario 3**
All 14 segments on the segmentation frame, as well as South Africans who are not represented on the frame are activated to reach the targets.

Source: Monitor/Grail Analysis
High-level Roadmaps for Reaching NTSS Targets

Scenario 1: Five Most Attractive Segments Only

If we look at activating only the five most attractive segments, the CAGRs that would be required to reach the targets, particularly by 2015, are very high.

In order to be successful in this scenario, SAT will need to focus relentlessly on the 5 most attractive segments:

- Building demand through advertising on national platforms
- Ensuring that interested consumers are converted through executions to support information gathering and to drive purchase in collaboration with trade partners
- Ensuring that product available matches the product needs of the consumer perfectly, which is not currently the case

However, even following extremely aggressive marketing activations, the 2011-2015 CAGRs would be difficult to obtain in such a short period of time.

Targets for number of travellers are not possible for this scenario, unless economic growth leads to the segments growing through income increases.

Source: Monitor/Grail Analysis; SAT Domestic Survey 2010
In this scenario, the major focus remains on the five most attractive segments, but the remaining 9 segments on the segmentation frame contribute additional growth towards the targets.

**5 Most Attractive Segments**
- Number of Holiday Trips:
  - 2011-2015: 44%
  - 2015-2020: 11%
- Number of Non-Holiday Trips:
  - 2011-2015: 70%
  - 2015-2020: 7%
- Number of Travellers:
  - 2011-2015: 42%
  - 2015-2020: 3%

**Additional 9 Segments**
- Number of Holiday Trips:
  - 2011-2015: 30%
  - 2015-2020: 7%
- Number of Non-Holiday Trips:
  - 2011-2015: 50%
  - 2015-2020: 5%
- Number of Travellers:
  - 2011-2015: 20%
  - 2015-2020: 1%

- In scenario 2, the CAGRs required from both the 5 most attractive segments and from the additional 9 segments on the segmentation frame are more feasible.
- In order to do so, an integrated marketing strategy should guide:
  - Disproportionate investment in terms of both budget and funding on growing the 5 most attractive segments through both demand-building and fulfilment.
  - Lower levels of investment in defending those individuals in the additional 9 segments who are already travelling, as well as growing those who are not, primarily through demand-building activities.

Targets for number of travellers are not possible for this scenario, unless economic growth leads to the segments growing through income increases.

Source: Monitor/Grail Analysis; SAT Domestic Survey 2010
High-level Roadmaps for Reaching NTSS Targets

Scenario 3: All 14 Segments + Others

In the final scenario, varying levels of focus are required on all 14 segments represented on the segmentation frame, as well as on those consumers earning less than R3,000 per month who are not on the frame.

- **5 Most Attractive Segments**
  - 2011-2015: 15%
  - 2015-2020: 13%

- **Additional 9 Segments**
  - 2011-2015: 12%
  - 2015-2020: 10%

- **Other Segments**
  - 2011-2015: 9%
  - 2015-2020: 6%

Building on scenario 2, this scenario would require an integrated marketing strategy focused disproportionately on growing the 5 most attractive segments, as well as an educational campaign aimed at encouraging additional travel among those adults earning less than R3,000.00 per month.

- This campaign could be run in both schools and in workplaces to build awareness of tourism and its value, as well as to encourage people in lower income segments to travel both for holiday and for other reasons.

- This campaign will likely only have an effect in the medium-to-long-term.

Source: Monitor/Grail Analysis; SAT Domestic Survey 2010
To reach the targets set out, the approach required would need to be targeted differently and complemented with different elements depending on the scenario chosen.

**Scenario 1**
Only the five most attractive segments are activated to reach the targets

**Scenario 2**
All 14 segments on the segmentation frame are activated to reach the targets

**Scenario 3**
All 14 segments on the segmentation frame, as well as South Africans who are not represented on the frame are activated to reach the targets

- Integrated marketing activations focused solely on the five most attractive segments
- Integrated marketing activations with demand-building activities focused across all 14 segments and fulfillment activities focused on the most attractive 5 segments
- Integrated marketing activations as in scenario 2, supported by educational activities aimed at lower income consumers
Recommended Approach

To reach the targets set out in the NTSS, both an integrated marketing activation, (demand building at a national level and segment-specific fulfilment), and a national education campaign is required

All 14 segments on the segmentation frame, as well as South Africans who are not represented on the frame, but are over 18 years of age, are activated to reach the targets

**Advertising through mass media platforms:**
Messaging and media choices focus on the most attractive segments but have a broader impact

**Education targeting lower income segments:** Primarily focuses on improving awareness of tourism and its value to build the culture of tourism

**Fulfilment targeting most attractive segments:** Primarily focuses on fulfilment to support information gathering and to drive purchase for the five most attractive segments

Source: Monitor/ Grail Analysis
Recommended Approach

In addition to the activation strategy, it is important for all players in the tourism cluster to assist in creating the right environment in which tourism can flourish...

Domestic Travellers
Individuals, families, tour groups, sports teams, study groups, business people, delegations, politicians, etc.

Attractions
- Holiday Resorts/Beaches
- Game Parks, Recreational Facilities, Wildlife
- Cultural Villages
- Historical Places

- Sports Events/Public Events
- Business/Congresses

Suppliers
- Direct
  - Transportation (Airline/Coaches/Ships, Railway)
  - Tour Operators, Agents/Guides
  - Hotels, Guesthouses, etc.
- Indirect
  - Construction
  - F&B Services
  - Financial Services, Insurance
  - Car Hire, Medical Services

Tourism Organisations
- National Government
  - NDT, SAT

Economic Foundations
- Provincial Governments
- Local Government
- Communities
  - Cape Town
  - Durban
  - Sun City
  - Others

Soft Infrastructure
- Universities, Training Institutes, Schools, etc.
- Police & Security
- Industry Associations
- Banks & Financial

Hard Infrastructure
- Roads
- International Airports
- Telecommunications
- Utilities

Note: Cluster map has been created as is from the source
Recommended Approach

...Including ensuring that more and more South Africans have the means to travel through increased income, that travelling in South Africa is safe, and that the product supply matches the desires of consumers

- The economic foundations supporting the tourism cluster must ensure that:
  - Destinations in the country offer visitors (both domestic and international) **solid infrastructure** which makes travel easy and hassle-free and a **safe and secure environment**, as well as **hospitable and welcoming communities**
  - The economic situation of South Africans is one that improves over time, so that **the number of people who can afford to travel for holiday increases**

- Supply needs to be developed in such a way that it **addresses consumer needs** in terms of:
  - **Affordability**
  - **Availability** of different product
  - **Safety and security**

Note: Cluster map has been created as is from the source
Integrated Marketing Activation

The umbrella strategy combines aspects from all segments to create awareness and positivity around tourism for all South Africans

**Value Proposition**

- Have fun in new/different surroundings, whether with existing friends or meeting new friends along the way
- Spend quality family time and broaden the family’s horizons, while being rewarded for hard work
- Domestic travel is the quickest and easiest way to enjoy invaluable and enviable world-class experiences
- South Africa has so many different places and ways to escape, relax and spend quality time with loved ones
- Break away from daily pressures, whether relaxing with family or having good times with friends

**Products**

- Lots of activities with friends without being prescriptive
- Accessible and informative family holidays
- Glamorous and comfortable holidays
- Explore hidden cultural, culinary and landscape gems
- Hassle free and comfortable getaways

**Umbrella Strategy**

- Travelling in South Africa is not only a great way to explore the country and discover the many reasons why the rest of the world wants to visit, but also an accessible way to escape and have fun with family and friends
