   - International Leisure
   - Domestic Leisure
   - Business Tourism
   - Events

5. Review of 2002-2006

6. Conclusion
The Strategy Development Process

The information and strategic plans contained in this document are based on extensive research and consultation conducted by SA Tourism over the past five years.

The process of developing the strategy was guided by a set of core principles to which we believe we have remained true.

The insights we have gained and used to inform our strategic choices were generated through two parallel, but integrated, processes:

1. The Tourism Growth Strategy started in 2001 and is a market-facing process that involves on-going research and analysis to support critical choices around which markets and consumer segments to focus on, and specifically how to activate growth through marketing, brand positioning and channel fulfillment in the chosen focus areas while at the same time monitoring and evaluating our work.

2. The Global Competitiveness project was done in two phases in 2003/4 as a joint project with the Department of Environmental Affairs and Tourism and the Department of Trade and Industry. It studied how competitive the South African tourism sector is and has initiated a set of actions to adjust the competitive platforms and micro-economic context of the industry to fill key product gaps and upgrade the overall performance and rate of innovation in South Africa’s tourism industry.

This document details the Tourism Marketing Strategy of South Africa which forms part of the broader Tourism Growth Strategy. More information is our website www.southafrica.net/research
Guiding principles of the Tourism Growth Strategy (TGS)

The TGS was developed according to a set of consistent principles

Focused

We have limited human and financial resources so must be focused in all our activities so we make choices and explicit trade-offs which have a long-term strategic impact on South African tourism. This is not about doing everything on offer but making choices based on ROI and business objectives, and making clear decisions on what you do and do not do.

Data Driven and customer focused

The strategic decisions that drive the TGS are based on sound data and analysis, and not anecdote. It is about understanding consumers who are attractive for South Africa in terms of our objectives and the immediate focus is on people who are interested in traveling to South Africa.

Consultative to build sector ‘co-opetition’

The TGS process is consultative, incorporating input from as many stakeholders as possible. The principle is to build “co-opetition” in the sector so that we co-operate on building volume and compete on service and move away from the current destructive competition.

Goals are GDP, jobs and transformation

Choices are made in relation to our mandate and the national tourism goals in the Tourism Act: to promote GDP growth and job creation and the transformation of our economy through six key objectives (growing volume, spend, length of stay and provincial distribution while reducing seasonality and promoting transformation)

Transparent

The choice-making processes and source of data is transparent to build consensus on building tourism against the broader nation’s goals while informing business-level decision making within a broader context.

1 The concept of “Co-opetition” is used here with the same meaning as that described by Adam Brandenburger and Barry Nalebuff in their book of the same title.
### Mandate and Key Strategic Objectives for Tourism

**The Tourism Act’s mandate to SA Tourism is ...**

- Sustainable GDP Growth
- Sustainable job creation
- Redistribution and transformation

**... through six key objectives ...**

- Increase in tourist volume
- Increase in tourist spend
- Increase length of stay
- Improve geographic spread
- Improve seasonality patterns
- Promote transformation
The Tourism Growth Strategy has two areas of focus: The outward looking Marketing Strategy and the internal Global Competitiveness Programme.

- **Tourism Marketing Strategy**
  - Choose and Understand Target Markets and Consumers
  - **RECRUITMENT**
    - "Get them here"
    - Build the Brand
    - Marketing Strategy
    - Channel Strategy
  - **LEVERAGE**
    - "Repeat and Recommend"
    - Loyalty and CRM
    - Generate word-of-mouth

- **Global Competitiveness Programme**
  - **DELIVER THE EXPERIENCE**
    - Develop the Products
    - Deliver the Service
  - **UPGRADE THE BUSINESS ENVIRONMENT**
The success of delivering the mandate of tourism lies in different areas – together they form the Tourism Growth Strategy.
This is dependent on the co-ordinated delivery of different organisations on their mandates as most of them sit outside tourism.
Co-ordination is even more challenging because tourism industry cluster consists of a large number of players.

**Government Policy**
- National (SAT, DEAT, DTI & Others)
- Regional (Regional Tourism Authorities & Provincial Government)
- Local (Local Tourism Authorities & Local Government)

**Promotion**

**Channel**
- Outbound Tour Operator
- Inbound Tour Operator & Ground Handler (>800)
- Travel Agents (>800)

**Selling**

**Supporting Industries**
- Banking
- Laundry
- Outfitting
- Insurance

**Food and Beverage**
- Restaurant
- Catering
- Bars & clubs

**Hard Infrastructure**
- Roads
- Airports
- Telecom
- Rail
- Security
- IT Services

**Soft Infrastructure**
- Roads
- Airports
- Telecom
- Rail

**Attractions**
- Beaches (73)
- Game Parks & National Reserves (481)
- Cultural (47)
- Arts & Crafts (87)
- Museums (611)
- Sport (16)
- Adventure (624)

**Accommodation**
- Hotels (1,233)
- Game & Hunting Lodges (1,000-5,000)
- Bed and Breakfasts (5,000-10,000)
- Guest Houses
- Backpackers (163)
- Self Catering (2,415)
- Timeshare (170)

**Supporting Industries**
- Legal
- Medical
- Real Estate
- Construction

**Supporting Industries**
- Catering
- Supplies to accommodation sector
- Security services

**Consumers**

Note: International and Domestic Consumers

Mandate and Key Strategic Objectives is the Vision for Tourism

The Tourism Act’s mandate to SA Tourism is...

<table>
<thead>
<tr>
<th></th>
<th>Sustainable GDP Growth</th>
<th>Sustainable job creation</th>
<th>Redistribution and transformation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increase in tourist volume</td>
<td>Improve geographic spread</td>
<td>Increase in tourist spend</td>
<td>Improve seasonality patterns</td>
</tr>
<tr>
<td>Improve length of stay</td>
<td>Promote transformation</td>
<td>Facilitate the removal of obstacles</td>
<td>Choose the attractive segments</td>
</tr>
<tr>
<td>Market the Destination</td>
<td>Monitor and learn from tourist experience</td>
<td>Understand the market</td>
<td>Facilitate the product platform</td>
</tr>
</tbody>
</table>
In developing an integrated growth strategy for South African Tourism, trade-offs needed to be made across three key dimensions:

- **Time**
  - Demands for rapid
    - economic growth
    - social improvement
    - poverty alleviation
    - profitability

- **Resources**
  - Political capital
  - Legislative attention
  - Financial capital
    - investment
    - operations
  - Leadership

- **Scope**
  - Range of objectives
  - Range of markets and customers
  - Range of products
  - Range of channels
  - Breadth of participation
Therefore South African Tourism sees its role in the tourism sector in terms of what it actually does as an organisation and what it facilitates.

- **Understand who is out there**
  - **DO** the research to inform the choices about which market spaces we will ‘play’ in
  - **FACILITATE** industry insights on customer product and service needs

- **Choose those who we can & want to get here**
  - **DO** the choice-making for SAT’s focus markets and segments and tourism brand development
  - **LEAD** the choice-making process for other markets

- **Get them here**
  - **DO and LEAD** marketing in focus markets and tourism brand development
  - **FACILITATE** the unblocking of barriers (eg flights, visas)
  - **FACILITATE** packaging for core markets

- **Get them to the product**
  - **FACILITATE** the tourist-product connect
  - **FACILITATE** appropriate product development

- **Ensure they have a good experience**
  - **MONITOR** tourist satisfaction and experience
  - **LEARN** from feedback
  - **FACILITATE** learning by industry

6. Conclusion 106
A vision for tourism: the key challenges for tourism

The Tourism Act sets out clearly the mandate for SA Tourism and it is against that mandate that we make the strategic choices in the organisation. The mandate is delivered through the six key objectives that are levers for tourism growth. What is important to remember is that no one tourist can deliver all six objectives and that the strategy must look across the globe for consumer segments and markets that can help us realise our goals.

Since the transition to democracy in 1994, South Africans have become aware of the potential for tourism to play a meaningful role in contributing to the economic development of our country and our people. Government has prioritised tourism as one of five economic growth sectors on which to focus its efforts to support investment and facilitate growth.

The period of strong growth since 1990 has fundamentally changed the face of the tourism industry in South Africa. With a small domestic market and less than 1 million annual foreign arrivals in the two decades before 1990, we have grown to a destination that welcomed more than 7 million visitors by 2005.

The early stages of the TGS process involved wide-ranging interviews across the industry and a data-rich assessment of what key challenges needed to be addressed. In that process, the facts around past performance and the experience of the industry was that whatever strategy emerged, it could only deliver against the mandate if it set an action programme that would successfully address eight key strategic challenges on an on-going basis. These eight challenges were identified as follows:
CHALLENGE: Volume

Tourism arrivals have grown eight-fold since 1990, but further growth is essential if tourism is to make a meaningful impact on job creation and GDP growth. With the size of our population and unemployment levels, South Africa cannot be a high-end, low impact destination (ie niche) for a few wealthy foreigners. Tourists today lack the time and money to travel for long holidays so we need focus on growing the volume.

This does not deny the importance of the high value parts of the market. Instead, it implies the need to reach into and beyond the exclusive five- and four-star markets into the middle (three- and two-star) markets in order to achieve the volumes necessary to create jobs across the country. The TGS’s focus is on growing the cake not re-dividing it.

Two of the associated challenges are therefore to make the country:
1. More affordable, and
2. Open it to younger travellers in whom we could make a lifetime investment as potential repeat travellers to South Africa at different stages in their life.

Against this background, South Africa has had to understand that volume growth needs to be pursued deliberately and systematically and that the ‘goodwill’ impact of the end of apartheid on tourism from 1990 had largely played out by 1998.

Furthermore most of our arrivals come by land from our neighbouring states (where we have an outbound market share of 69% to 99%) so we need to look beyond the region for new growth. Volume is therefore a critical part of the portfolio review as we look at the high-volume travel markets of the world (and in particular, the big long-haul markets) for overseas arrivals.
Evolution of international tourism to South Africa

Foreign Tourist Arrivals to South Africa, 1965-2006

CAGR:
- 1998 – 2001: 0.3%
- 1998 – 2005: 3.7%
- 1998 – 2006: 4.8%
- 2001 – 2005: 6.2%
- 2001 – 2006: 7.5%

- First Democratic Elections
- Sanctions against South Africa lifted
- Nelson Mandela released

1970s and 80s – Stagnation
- Stagnation drove low investment, focus on narrow white domestic market and costs

1990-1998 – Growth
- Initial period of short-term profit-taking followed by period of investment growth and entry of foreign players
- Start of new focus on skills and training

1998 onwards – Cyclicality
- Global events, currency volatility drive uncertainty and short-term strategy by firms
- Investment rates remain weak overall
- Skills development slow

*based on opinion of participants interviewed, anecdotal evidence

Note: Long haul outbound data was calculated using the proportions estimated from WTO data source and applying it to the Euromonitor data. It is the closest approximation as this data is not available. Data for the USA was sourced from U.S. Department of Commerce, ITA, Office of Travel and Tourism Industries, September 2006 as 2005 WTO data was incomplete and skewed the results.

Source: Euromonitor IMIS, WTO Yearbook of Tourism Statistics 2006
Short-haul dominates foreign tourism while VFR is the biggest generator of domestic trips

While we have grown the size of total arrivals, the proportion of long-haul travellers to short-haul has decreased from 31% in 2004 to 27% in 2005.

Most of our foreign tourist arrivals come by land from neighbouring countries where the we currently have high market share and the challenge is to get these tourists to come more often or travel to South Africa to do different activities.

The growth potential in the long-haul market (ie flying time of more than five hour) is bigger as our market share is low.

The main purpose of travel in South Africa is to visit friends and relatives (VFR) 25 million trips. The second largest is holiday (4.5 million trips). The third largest reason for travel is for religious reasons.

But holiday travel is the biggest generator of revenue so is the focus of the strategy to grow domestic travel in our country.

Number of Domestic Trips by Trip Purpose: 2005

Source: SA Tourism Domestic Tourism Surveys for February 2005 until January 2006
Extending beyond the high-end game

*South Africa’s positioning in overseas markets has historically been predominantly aimed at the high-value, low impact market making our country an expensive destination that few tourists could afford.*

Where we are

Opening up the appeal of the destination **DOES NOT** mean that we will no longer serve the high value end of the market, rather it implies that clusters of tourism products will reconfigure themselves to successfully serve a range of segments from the high-end segment to three- and two-star tourists.

Where we want to be

Where we DON’T want to be
CHALLENGE: Value

Tourism is often called the “new gold” of the South African economy as the total foreign direct spend of tourists has overtaken gold foreign exchange earnings[1]. Two of the key challenges around increasing value from tourism are to:

1. Maximise the spend of our current travellers to increase revenues, and
2. Maximise the relationship between volume and value in our choice of markets such that we maximise the return on the marketing effort.

While the contribution of tourism to South Africa’s GDP is round R120 billion[2] and has outperformed all other sectors in terms of both GDP and job creation[3], there remain opportunities to extract further value. Compared with our global competitors for example, we appear to be under-performing our potential.

---

[3] Gearing up to be Globally Competitive: DEAT, the DTI and SAT Global Competitive Study (2003/4) www.southafrica.net/research
South Africa needs more arrivals than its competitors to create a job

The ratio for the well established tourism destinations of Australia, Thailand and the US may suggest the optimal ratio for serving visitors. Is SA trading off ‘effectiveness’ for ‘efficiency’?

1 Only employees directly employed in the tourism sector were used to do this calculation
Source: WTTC (The 2003 T&T Economic Research), BTR, ITA Office of Travel and Tourism Industries, Tourism Authority of Thailand, Embassy of Brazil in London, SAT
Australia creates more jobs and value than South Africa

The Global Competitiveness study benchmarked South Africa tourism’s performance externally against our biggest global competitors (Australia, Brazil, Kenya and Thailand) while also internally against other sectors of the economy*.

Whereas Australia creates one job for every eight foreign arrivals, South Africa creates a job for every 12 arrivals. According to the World Travel and Tourism Council, the global standard is that every eight foreign arrivals should create one direct job in the host country.

Value-capture per employee is also an important benchmark. For every direct employee in the tourism sector, Australia earns US$ 12,232 in receipts compared with South Africa which earns US$ 7,002 per employee per year.

These results can be explained by the very different market demographics of the two destinations. South African tourism is dominated by a domestic market that has limited resources, and a foreign market drawn largely from neighbouring states which are less developed than our own.

Research into the travel patterns of tourists from neighbouring states (and many overseas business travellers) reveals significant missed opportunities. These range from the lack of availability of desired products in our experience (particularly cultural tourism) through to limited night activities as many tourists stay in their hotels for fear of their safety.

Thus, growth, jobs and transformation need to be underpinned by a deliberate strategy to increase the value of tourism arrivals through either/or encouraging more frequent travel, increasing the length of stay, as well as increasing the average spend per day during a trip.

* Tourism outperforms all priority sectors of the SA economy in terms of job creation and contribution to GDP, Global Competitive Study 2003
Australia outperforms the competition in value capture per employee

South Africa’s value extraction is reasonable, but the larger questions are how to grow employment (to Australian levels per tourist) and increase value capture.

Source: WTTC; BTR, Tourism Authority of Thailand, Embassy of Brazil in London, ITA Office of Travel and Tourism Industries
Another way to increase value is to increase length of stay but the global trend is towards more short (rather than few long) holidays.

South Africa’s average length of stay is significantly affected by the high proportion of land travellers who typically stay for 2 days but the average of 10 days is line with global trends.

**Distribution of South African Arrivals by Length of Stay, 2002**

- **Average length of Stay**:
  - All tourists: 10 days
  - Land arrivals: 7.7 days
  - Air arrivals: 14.5 days

- **Most common length of stay**:
  - All tourists: 2 days
  - Land arrivals: 2 days
  - Air arrivals: 7 days

---

1. Average length of stay calculated as a weighted average (weighted by relative proportion of source countries).
Internally, the tourism sector is the only priority\(^1\) sector showing positive growth in employment and GDP, however transformation levels are poor.

On an Internal Basis
- Tourism is performing well relative to the other priority sectors and is creating jobs and value.
- However, transformation of the tourism levels in the industry are poor.

---

Note: 1 Priority sectors as identified by Cabinet, CAGR applied to each sector for period 1998-2002, Tourism GDP values are estimates
Source: DTI; Quantec, 2004; SAT; Monitor Analysis, GCP Phase 1 2004
CHALLENGE: Transformation

Aligned to the goal of tourism value reaching an ever-widening circle of our nation is the important challenge of ensuring the direct participation by the previously disadvantaged majority in the industry. Tourism is still predominantly white-owned and white-managed. The imperative to transform goes beyond the desire to extend economic participation alone. Transformation is in many ways a key opportunity and requirement for future growth. Apart from the fact that unless transformation occurs there won’t be enough managers or businesses to meet the demand for new capacity. There exist clear signals in the market that transformation will be the key to unlocking new opportunities for growth.

Consumer research has revealed that foreign tourists are exposed to fewer and less authentic cultural experiences than they expect or desire. The uniqueness of our diverse cultures, both in their historical and modern forms, represent a significant opportunity for South Africa’s competitiveness globally – exactly because this speaks directly to one of the key drivers of outbound Western markets: the desire to experience another culture.

In the domestic market, the challenges of growing tourism in emerging tourism segments is in many respects dependent on new offerings becoming available. Despite conventional wisdom, emerging tourism segments want many of the same things as the foreign market – and they want it delivered by an industry that represents the totality of South African society. The mandate of the TGS process is to develop an approach that not only supports the transformation agenda, but which also specifically seeks out sources of growth through transformation.
CHALLENGE: Distribution

If tourism is to impact significantly on poverty and unemployment, then tourism must develop in areas beyond the traditional tourism routes and nodes currently used. Provincial-level data reveals that Gauteng and the Western Cape enjoy the bulk of tourism receipts as these are the two areas visited by most foreign tourists. In the domestic market, KwaZulu Natal has the highest visitors but most of them are from the province.

The challenge for the TGS process was to seek opportunities to extend the access to market for less-developed provinces. In part, this would include developing products to encourage international tourists to increase the average number of provinces visited on a trip (or to return to visit new and different places), and to encourage new and existing domestic travellers to explore destinations outside their traditional patterns. For this to be successful new products must meet the desired experience of these consumers (ie not ‘build it, and they will come’).

The second aspect involves choosing consumer segments in markets who are interested in exploring the country.

While UK and USA tourists tend to visit one to two provinces, there are segments in France, Germany and the Netherlands who go off well-known tourist routes and explore less visited places. The latter two markets also have high repeater rates to our country.
CHALLENGE: Tourism value from long-haul travel was being captured mainly by three provinces — adding up to 76% of the tourism receipts.

Average Length of Stay per Province by Long-Haul Tourists to South Africa — Departure Surveys (2005)

- **Low**: 3.8, 5.2, 3.8
- **Medium**: 7.1, 5.6
- **High**: 8.9, 9.9

Share of Nights Spent by Province (2005)

- **Western Cape**: 39.9%
- **Gauteng**: 20.6%
- **KZN**: 15.7%
- **Other**: 23.8%
CHALLENGE: Seasonality

Like many other destinations, South Africa faces the challenge of seasonality in domestic and foreign arrivals. Domestic travel patterns follow the patterns around school, religious and traditional holidays, with strong peaks at year-end and Easter.

The seasonality of foreign arrivals varies by region (driven by market-specific and traditional holiday patterns). Overseas arrivals, dominated by significant numbers of VFR arrivals and the tradition of the “big trip” being in the European winter, result in a strong peak starting in October and ending in February. June is traditionally South Africa’s lowest month and for some key overseas markets represents almost half of the arrivals for the year-end peak.

These seasonal patterns present a significant challenge for product owners and transport operators as business profitability and job sustainability is a function of activity throughout the year. Both costs and investment must therefore be made in line with expected total annual revenues.

To invest ahead of growth in an environment where new demand will be further concentrated at one particular time of the year doesn’t make business sense. For this reason we experience the perennial issue of limited seat availability on airlines in the peak. At the same time, the impact of employment is also sub-optimal as jobs increasingly become seasonal and temporary in nature.

Against this background, the TGS and Portfolio Review looks for opportunities to address this challenge – particularly through finding new market segments (domestic and international) whose travel patterns may be more flexible so we can extend the season and reduce the level of the gap between high and low months.
The deep seasonal pattern of arrivals created significant challenges for investing in capacity to serve increased demand as well as sustainability of jobs and current product.

The seasonal pattern of arrivals vary by region but are a major constraint on capacity for growth.
Over-exposure to Europe and Africa raised the need to spread the risk globally and invest in Asia and the Americas.

- **Europe**: 1,308,634 arrivals (17.8% of total)
- **North America**: 274,281 arrivals (3.7% of total)
- **Middle East**: 33,551 arrivals (0.5% of total)
- **Asia**: 179,142 arrivals (2.4% of total)
- **Central & South America**: 47,818 arrivals (0.7% of total)
- **Australasia**: 95,818 arrivals (1.3% of total)
- **Africa**: 4,642,071 arrivals (72.9% of total)
- **AFRICA**: 5,356,512 arrivals from mainland Africa (72.7% of total)
- **Other**: 5,356,512 arrivals from mainland Africa (72.7% of total)

Source: StatsSA
CHALLENGE: Risk Management

Tourism industries, particularly those which are heavily dependent on foreign source markets, are vulnerable to unpredictable events outside of their spheres of direct influence. The last two decades have seen national tourism industries buffeted by a series of events from the Asian economic crisis, the events of 9/11, and the Asian SARS virus to the Tsunami of December 2004.

Destinations like Australia, South Africa and Brazil have in addition faced challenges around global exchange rate fluctuations which have made price consistency management and competitiveness challenging.

Some of the cyclicality in South Africa’s growth performance can be attributed in part to an over-dependence on a narrow set of source markets – mainly neighbouring states and Europe.

The TGS process was therefore mandated to find an approach that ensured that limited marketing resources were deployed in a fashion that achieved an appropriate balance between the need to focus as well as reducing the level of dependence on a set of markets in one or two economic regions.
CHALLENGE: Sustainability

The recognition that South Africa’s competitive strategy needed a fundamental review was accompanied by a clear desire that future growth must be sustainable in the long run. While the patterns of growth in recent years suggest that there will always be periods of growth and followed by periods of consolidation, these should not become patterns of boom and bust driven by short-term tactical approaches to market opportunities. Instead, growth in our industry must become about sustained investment behind clear choices around how to differentiate ourselves in important target markets for the future development of our destination.

Thus the mandate to the TGS process was that the choices made about which markets to target, how to re-position the brand, and how we compete in the channel and the market, needed to be choices about the long term.

These choices would have to enable South Africa to differentiate itself from the world in a way that is compelling to consumers, internally consistent, practical to implement, inspiring of confidence in investors and the industry, and clear and action-oriented in its message about what needs to be done.
The core challenges identified are symptomatic of powerful patterns of change in the global tourism markets.

- More Complex Consumer Segmentation
- Intensifying Competition
- Consolidation and Specialisation in the Channel
- Fragmentation within Local Tourism Clusters

"COMMODITISATION"

- Category “trap” (Eg Sun & Beach, Resort)
- Undifferentiated competitive positioning
- Increasing value capture within the channel
- Destructive internal rivalry

- Declining Growth
- Declining Yields
- Internal convergence in product offerings
- Limited Innovation and Competitive Upgrading
With product offerings that overlap so much, it’s easy to offer a diversity of offerings - and become commoditized in the process.

The combined product offerings of ‘ANY COUNTRY’

Source: Composite of offerings/pictures from the countries studied
CHALLENGE: Competitiveness

All of the challenges described before ultimately come back to a single key proposition: South Africa, in order to achieve sustained growth, must to be able to differentiate itself from its competitors now and for future growth.

In a dynamic world market, differentiation requires constant innovation and renewal because tourism is rife with the practice of replicating good ideas and not so good at creating new ones. So flavour of the month soon becomes yesterday’s news.

An industry that is innovative is one that is characterised by businesses, institutions and organisations that are informed, sophisticated in their outlook and constantly investing to upgrade their performance against their consumer’s every changing needs and choices.

While there is evidence of many new and interesting things happening all the time – in terms of offerings, products, and experiences – in the mind of consumers globally, South Africa remains, on the whole, much the same as what it was 10 to 15 years ago. South Africa is still perceived mainly as an adventurous wildlife destination with striking natural beauty.

Most consumers globally have low levels of travel awareness about South Africa and regard our country as generally unsafe and often unstable as well. Our cultural assets are largely unclear in the consumer’s mind, and undifferentiated from the rest of the continent.
Challenges that remain going forward

Internally, our tourism industry remains fragmented, and often inter-company, inter-provincial and inter-city competitive behaviour is destructive. Firms at different parts of the value chain often struggle to find opportunities for co-operation and collaboration, leaving the space open for stronger players higher up the value chain to exert considerable influence over pricing, packaging and the shape of the value proposition.

Tourism value-chains are still under-developed, and linkages across the industry are still generally fragmented and shallow. Supporting institutions and organisations, whether public or private, are relatively new and face periodic crises of confidence and legitimacy as they struggle to find adequate skills and resources.

Thus the mandate for the TGS process was extended in 2003 to move beyond the challenges of competitive go-to-market strategies in target markets. The next stage had to extend into identifying what needed to be done in order to upgrade the micro-economic context within which tourism firms operate (i.e. the business environment) and where new platforms to support competitiveness need to be established.

All of the eight challenges described above have to be addressed in ways that recognise the realities of a dynamic and difficult global market. Whatever the TGS process came up with, it had to be bold in its ambitions, and at the same time realistic about what constraints are imposed by the realities of global markets.
The global context continues to challenge us to make tough choices

- Despite increases in overall funding of the marketing campaign, the total budget is small in global terms, and as the currency weakens, is getting smaller. SA Tourism needs to focus its efforts and resources on those countries and customer segments which are most valuable to South Africa.

- Arrivals to South Africa are still too dependent on a few large markets. The mix of arrivals needs to lessen dependence on volatile markets and at the same time increase our share in high-value markets.

- Generic ‘spray and pray’ marketing, and increased commoditisation of the offering by channels, results in averaging and low returns. SA’s marketing has to focus on specific sets of consumers (and the specific channels that serve them), and speak directly to their specific holiday buying criteria. We need to move from pushing what we like about SA to delivering to consumers what they want and in line with our tourism brand.

- Behind the strategy the tourism industry needs to redefine and upgrade products and services to deliver against the promise offered by the marketing message.
Defending share while pursuing new growth opportunities

SA Tourism needs to mount a defense of share in our areas of strength while at the same time aggressively pursuing growth in volume, value and reducing seasonality.

Travel Categories

Our targeted growth areas are:-

- **Leisure travel** (domestic and international)
- **Business Tourism** (conferences, meetings and incentive travel)
- **Opportunistic marketing** (these are large one-off marketing opportunities leveraged off other events eg the 2003 Cricket World Cup, the 2010 Soccer World Cup, the World Summit on Sustainable Development in 2003, the North Sea Jazz in Cape Town, Fashion Week)

Our Focus: Where to play?

The strategy for growth defines how limited marketing resources will be employed to drive growth from selected high-potential target categories, markets and consumer segments when measured against our objectives.

Those choices are guided by a core principle: we defend our current position while we look for, and pursue, opportunities for growth in both leisure and business tourism.

The core of SAT’s business is marketing in the leisure and the business tourism markets. **Leisure** (which combines holiday travel and visiting friends and relatives (VFR) as well as domestic and international travel) and **business tourism** (as opposed to business travel) are areas of focus because they are forms of travel that involve active choices that can be influenced through marketing.

**Business travel** is driven by the interests of a particular business and is therefore difficult to influence. Here the opportunities is to get the business traveller to extend his/her trip by a few days for leisure, or return later for leisure. In both cases the ROI is difficult to measure.

**Event marketing** is driven by leveraging off major events that are not part of our core business. There are two major aspects to this activity that support our key objectives – (1) getting more people to attend the event and thereby growing volume and value, and (2) using the event to position the country by building awareness of the destination.

SAT is organised internally around four regional geographies:

(1). Africa and Middle East (including domestic and regional land travel) (2.) The Americas and the UK (3) Asia and Australasia (4) Europe
To obtain growth and defend the current shares, the strategy needed to integrate the approach through focusing the five key drivers.

Different countries and/or segments drive growth in different ways.

- **1. Retain uses** by existing consumers
- **2. Stimulate current uses** with existing consumers
- **3. Generate new uses** by existing consumers
- **4. Attract new-to-you consumers**
- **5. Attract new-to-category consumers**

- **1. Maintain current purchasing pattern by existing travellers and segments**
- **2. Stimulate current consumers to come here more often and for longer**
- **3. Stimulate current consumers to come here for new purposes, experiences and offerings**
- **4. Convert consumers and segments from the competitor to South Africa**
- **5. Convert low-frequency or non-travellers into frequent travellers, or short-haul travellers to long-haul travellers**
60% of South Africa’s arrivals are from our 5 neighbouring states

Given the high market share already in SADC and the absence of any true competition, the strategy for SADC shifts to one of ‘defend’ and the extraction of additional value. Outside of neighbouring SADC however, there is scope to attract smaller high-end leisure volumes which in the long term may provide growth in markets in East and West Africa.
For countries outside of Africa, the focus for South Africa was to leverage all the growth drivers in the overseas (non-continental Africa) markets.

The real growth for South Africa is to focus the portfolio on countries and markets that are attractive from a volume and value perspective and from which South Africa can get the greatest yield in the short- to medium-term. Clearly some markets are more seasonal than others. Category conversion (ie from short-haul to long-haul travel) would be the most difficult to do.

1. Retain uses by existing consumers
2. Stimulate current uses with existing consumers
3. Generate new uses by existing consumers
4. Attract new-to-you consumers
5. Attract new-to-category consumers
Business Tourism cuts across several countries

The real value of Business Tourism lies in the ability to leverage resources to attract large numbers of delegates at low cost

- 1. Retain uses by existing consumers
- 2. Stimulate current uses with existing consumers
- 3. Generate new uses by existing consumers
- 4. Attract new-to-you consumers
- 5. Attract new-to-category consumers

6. Conclusion 106
1. Choosing the focus of international leisure marketing

The decisions about where to focus in leisure travel is a tri-annual review process of all the countries of the world (excluding the domestic market) being put through a series of filters. The application of these filters are designed to optimise against (1) maximising yield from marketing investments, and (2) balancing the portfolio to limit over-exposure to one or two regions. As above, review seeks to deliver against:

- Identifying where current positions must be defended
- Seeking opportunities for growth in volume
- Seeking opportunities for growth in revenue
- Seeking opportunities to reducing seasonal variations.

Thus our choices about where to focus in the four regions include:-

- Markets that are currently important to us – markets where we are strong and whose continued presence in our portfolio is critical to meeting our long-term objectives
- Markets that are attractive to us – those markets that are major sources of growth. These markets, where competition is stiff, also represent significant growth opportunity because of the sheer size of consumer segments in a relatively concentrated geographic space scale can be achieved
- Markets, that are attractive and which represent opportunities to spread our risk outside of Europe and Africa, and whose outbound travel patterns are counter-cyclical.

The results of the analysis are then organised into categories in each regional portfolio which informs the nature of the marketing approach to be adopted in each case.
The review adopts a “fresh eyes” approach by considering all countries in the world filtered on a set of attractiveness criteria.

Attractive markets

Qualitative process involving a panel discussion
Portfolio Review 2008-2010

The most recent portfolio review was conducted in 2007, and produced the following portfolio for the period 2008 to 2010:

Given that 60% of all arrivals to South Africa come from five neighbouring states, and that we enjoy dominant share in these markets, the strategy for SADC is principally a ‘defend strategy’ (i.e. retain existing tourists and extract additional value from them). Outside of SADC, however, there is scope to attract smaller high-end leisure volumes which in the long term provide opportunities for growth, especially from East and West Africa.

For countries outside of Africa, the focus for South Africa is to leverage all the growth drivers – defend current share and aggressively pursue new growth opportunities. The overseas portfolio is focused on countries and markets that are the most attractive from a volume and value perspective, and from which South Africa can get the greatest yield in the short-to medium-term. In these markets our core challenge is to build awareness and positive perceptions of South Africa as a leisure destination, and to ensure that our information and sales strategies are able to follow through by ‘closing the deal’ and that the consumer travels to South Africa.

It is against the different nature of the growth challenges in each of these domains that SA Tourism has invested in-depth market research in order to ensure that our marketing efforts are focused on the highest-yield consumer segments (who are interested and positive about our country), and against the drivers of growth that are appropriate in each chosen market. To date, SA Tourism has segmented most focus markets.
Key Steps of the Portfolio Review Process

1st filter
Exclude markets of less than 3 million people or GDP per capita is less than US$2,000

2nd filter
Top 50 markets in terms of outbound volume and value

3rd filter
How attractive are these markets in the short term and the long term?

4th filter
Application of cost-benefit evaluation

Unattractive markets

Salient set

Core, tactical, investment and watch-list markets

Exclude sub-Saharan Africa

Exclude markets with less than 4 million people living in urban areas

Exclude Africa land markets*

Top sub-Saharan Africa markets PLUS Africa land markets*

*Africa land markets are markets where more than 60% of arrivals to SA arrive by land.
The results of the evaluation will illustrate the suggested core, tactical and watch-list markets within each region.

Core markets are those which present the greatest opportunity. Tactical markets are those which should be considered for specific, tactical opportunities. Watch-list markets need to be watched for value segments.

The 9 core air markets account for 55% of air arrivals and 61% of foreign direct spend (excluding Africa land) respectively.
Having a chosen set of countries or markets is not sufficient. We need to understand consumers on a segment level.

There are three key reasons why SAT chose to do segmentation (or a variation thereof):

1. To understand how the market is structured at a consumer level.

2. To understand the relative size and value in the market as well and objectively show the relative contribution of the segments.

3. Allows one to identify the levers in the market that need to be pulled to activate the segment.
The action segmentation model generates deep consumer insights into chosen markets as the basis for developing marketing plans.

We use both qualitative and quantitative methodologies to test and size markets.
Growth and Activation Strategies have been developed

For each chosen segment, an activation strategy has been created. This includes an overall value proposition and depending on the segment’s drivers and barriers specific changes to product, price, positioning, place, or promotion.
In-depth consumer research in portfolio markets is consistent with the decision taken in the first phase of the TGS: to focus on consumers and not products. In the past SA was marketed in terms of what products were on offer with little reference to the desired experience of the consumer or a brand positioning for the country.

The second major value of consumer research is the ability to accurately measure the real opportunity for growth. Historically SAT worked with national totals and averages – ie total population, average spend and total outbound travel. This is inappropriate because in most source markets, the majority of the population travels short-haul if they travel (at all) beyond their own borders.

SA, being a long-haul market for all major tourism source markets, has to focus on people who are worldly, well travelled and interested in other cultures. They are also the most positive about our country and interested in travelling here.
These segments are in our focus markets across the world

But there are Two Core Segments in our international leisure focus.

Marketing in international markets is focused principally on worldly, well-travelled segments of travellers who are seeking new experiences. The brand and marketing strategies are focused on two priority segments who the form the heart of our global marketing campaigns:

The ‘Next Stop South Africa’ (NSSA) segment

The NSSA segment represents our traditional market. They are wealthier experienced international travellers, usually between the ages of 40 and 60 whose children (if any) have left home. They typically look for natural beauty and authentic cultural experiences. They prefer independent or small group travel, and look for luxury and comfort as part of their experience. Safety is a key consideration when choosing a new destination. Safari is a big draw-card when travelling to Africa.

The ‘Wanderluster’ Segment

The “Wanderluster” segment is made up of younger singles or couples between the ages of 25 and 40 and generally do not have children. They are young urban professionals earning higher incomes, and they already have considerable travel experience. Their desired experience centres on nature, culture and adventure with a strong liking for “urban vibe”. While also concerned with issues of safety and comfort, these consumers are driven more by the emotional appeal of a destination compared to the more practical NSSAs. They are generally more positive about South Africa in every market than any other segment but they also want to travel the world.

The other segment categories are pursued on a tactical or opportunistic basis only.
While we have made progress in growing the markets in our portfolio, there is still significant opportunity in 11 core markets.

For markets where SAT has conducted detailed research, there is still massive potential.

Size of Target Market in the 11 markets
76,540,000 Consumers

Size of Target Segments in the 11 markets
28,071,300 Consumers

Arrivals from 11 key Markets (2006)

2. Domestic Tourism Strategy

Domestic travel is a new area of focus in the Tourism Growth Strategy. The domestic strategy is based on research done in 2003 and was launched at Indaba 2004 in Durban. It is a logical growth as domestic travel serves a number of functions in most travel markets:

1. It is bedrock of the tourism sector in South Africa and contributes significantly to the business with more than 36 million trips recorded in 2005.
2. It has untapped potential and presents an opportunity for growth given that holiday travel accounted for 32% of total value captured in 2005.
3. The domestic market provided the base-load of tourism volumes and value, particularly to the majority of the provinces that are off the well-trodden path of international tourism.
4. In competitive theory terms, vibrant domestic markets support innovation and will therefore in the long-term aid international marketing efforts.

We have identified seven segments with varying current and strategic value. These segments were broadly clustered into the following three categories based on their current travel patterns: Established, Emerging and Untapped.

In the domestic market, SA Tourism focuses on three “emerging” segments made up of consumers who have travelled, but for whom lack of knowledge about travel opportunities is a key barrier to travelling more often. Currently the vast majority of domestic travel is still driven by visiting friends and family, but holiday travel contributes the largest share of value in the domestic market. The ‘Sho’t Left’ campaign, is targeting the emerging segments to inspire them to overcome the barriers that currently stand in the way of leisure travel.
The Domestic Market is important - and will become more so in future

- Half the population travels...
  - 52.8% of South Africans travel each year
  - On average, domestic travelers take 2.5 trips per year

- ... generating huge volumes ...
  - Domestic travelers generated a total of 36.2 million trips in 2005, compared to 6.7 million foreign arrivals

- ... generating significant value ...
  - In 2005, domestic tourists spent R 21.1 billion, compared to a total direct spend by foreign tourists of R 47.8 billion (2004)¹

BUT, the market is still emerging ...

Note: ¹International market data not yet available for 2005
The Domestic Market is still emerging

- 69% of trips are for visiting friends and relatives
- 62% of trips are taken within the home province
- Holiday travel starts once personal incomes exceed R 3,000 per month, and is established above R 10,000 per month

The market is “immature”...

- The domestic market is highly seasonal and closely tied to traditional and school holidays around Easter, July and December

...highly seasonal ...

- 63% of domestic tourism value is captured by KZN, Gauteng and the Western Cape
- 58% of domestic volume goes to KZN, the Western Cape and Gauteng

... geographically concentrated, and ...

- Domestic tourists generally display fundamentally different behaviours to international tourist
- Domestic spend is primarily on transport, food and accommodation
- “Social” activities dominate domestic travel behaviour, with wildlife, culture, and natural attractions taking up 2% or less of what domestic tourists do

... plays a limited role in driving sector development
The Market

- 56% of all trips originate in KZN and Gauteng
- The holiday market is concentrated (62% in KZN, Gauteng and the Free State), BUT
- The highest rates of holiday travel incidence are to be found in the Free State (30% of adults), and the N. Cape (23% of adults)

Where the Volume is

- 40% of domestic tourism spend comes from Gauteng, BUT
- The highest spenders per trip are in the Free State, Gauteng and the Northern Cape

Where the Value is

- Holidays made up only 4.5 million trips in 2005 (12%), BUT
- Contribute 32% of total domestic tourism spend (an average of R 1,525 per trip compared to R 339 for VFR)
- Have the highest average length-of-stay (5.9 nights)
- And have the highest incidence amongst younger adults (18 – 39 years), the same demographic whose incomes are rising the fastest

Holiday travel is the future
The Scorecard

The Winners

- KZN and Gauteng see by far the biggest volume and value
- The Western Cape sees a large net inflow of trips and spend and is a key destination for holiday travelers

The Development Project

- The Free State, Mpumalanga and the Northern Cape are seeing less value from domestic tourism than they should

There is an interesting provincial “balance of tourism trade”

- KZN, Limpopo, Eastern Cape, Western Cape, Mpumalanga and the Northern Cape all receive more volume and value than their own residents contribute to the market
- Residents of Gauteng, the North West and the Free State contribute greater value and volume to the total market than those provinces receive in total
There are many segments in the domestic market but SA Tourism focuses on the emerging young market in order to develop a culture of travel.

Consumer segments are categorised based on their current holiday travel status and differentiating between established, emerging and untapped markets.

<table>
<thead>
<tr>
<th>Category</th>
<th>Definition</th>
<th>Segments</th>
<th>Approach</th>
</tr>
</thead>
<tbody>
<tr>
<td>Established</td>
<td>• High average spend&lt;br&gt;• Majority of the segment travel for holiday purposes&lt;br&gt;• Little room for growth</td>
<td>• Independent young couples and families&lt;br&gt;• Golden active couples</td>
<td>• Defend and extract value</td>
</tr>
<tr>
<td>Emerging</td>
<td>• Medium average spend&lt;br&gt;• Only small proportions of the segment travel for holiday purposes&lt;br&gt;• Non-travellers represent opportunities to grow these segments</td>
<td>• Well-off homely couples&lt;br&gt;• Young and up-coming&lt;br&gt;• Striving families</td>
<td>• Grow and defend</td>
</tr>
<tr>
<td>Untapped</td>
<td>• Low average spend&lt;br&gt;• Few if any of these segments travel for holiday purposes&lt;br&gt;• Opportunity for growth exists however a dedicated education process will be required</td>
<td>• Home based low income couples&lt;br&gt;• Basic needs older families</td>
<td>• Develop</td>

   - International Leisure 53
   - Domestic Leisure 69
   - Business Tourism 76
   - Events 91
5. Review of 2002-2006 100
6. Conclusion 106
3. Business Tourism

South African Tourism has for many years been working the Meetings, Incentives, Conferences and Exhibitions (MICE) market- largely in support of industry efforts. At Indaba 2005, SAT launched its business tourism marketing strategy, ‘Business Unusual’.

As part of the first phase of the TGS, SA Tourism studied the MICE market and in 2006 developed a target lead strategy. Associations are the primary focus while corporate meetings and incentive travel are secondary. The exhibitions market was not seen as globally attractive given our geography and the relative strength that Europe has in this market. While business tourism was not as attractive as the leisure market in terms of the volume, it does provide a key opportunity for growth in spend (in incentive travel) and reducing seasonality.

Like the leisure strategy, the business tourism strategy will focus its marketing efforts on these segments in specific geographies:

**Europe**: UK, France, Belgium, Netherlands, Switzerland, Austria and Denmark, and Sweden and Italy (Incentives)

**Asia**: Australia and Japan and India (both incentives only)

**Americas**: Canada and the USA

**Africa**: Business travel and tourism is a core part of the current market strategy to develop the leisure market, and will be address as such. Business Tourism opportunities are in East and West Africa as well as SADC.

There will also be a strategic link to the domestic business tourism market, focusing on driving growth through inspiring ‘breakaways at home’ but this is driven by the cities and the provinces.
SA Tourism focuses on international business tourism market

There is a large and very lucrative domestic market which is the responsibility of the regional and local tourism authorities to target and develop.

Business Tourism

(A trip which is undertaken with the purpose of attending a conference, meeting, exhibition, event or as part of an incentive)

Domestic Business Tourism

- Conferences, meetings, exhibitions, events or incentives with a purely domestic audience
  - Exhibitions with a purely domestic audience
  - Local government meetings
  - South African Associations meetings
  - Local corporate meetings / off sites
- A large and lucrative market that should not be neglected

Global Business Tourism

- Conferences, meetings, exhibitions, events or incentives with an international audience
  - Regional / global exhibitions
  - Inter-governmental meetings at regional or global level
  - Regional/global association meetings
  - Corporate meetings involving participants from more than one country
  - Incentive trips for employees from outside South Africa
- Highly competitive global industry

Responsibility of provincial and local tourism authorities to target and develop

Not the focus for SA Tourism

Within the scope of SAT’s Business Tourism Unit

Focus of this project
## Business Tourism meets many of these high-level goals of SAT

<table>
<thead>
<tr>
<th>Category</th>
<th>Status</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volume</td>
<td>✔</td>
<td>- Business tourism is not a large market in comparison to the leisure market&lt;br&gt;- However, there is <strong>strong growth</strong> in the market in South Africa</td>
</tr>
<tr>
<td>Spend</td>
<td>X/✔</td>
<td>- Business tourists are not attractive on a total spend basis when compared to other categories of travellers, but <strong>on a spend per day level they perform well</strong>&lt;br&gt;- In absolute terms, spend by business tourists has shown significant fluctuation in the last few years</td>
</tr>
<tr>
<td>Length of Stay</td>
<td>X</td>
<td>- The length of stay of business tourists is in general <strong>shorter than for other visitor types</strong>&lt;br&gt;- However there is an opportunity to increase length of stay by encouraging pre- and post-tours to extend length of stay</td>
</tr>
<tr>
<td>Distribution by Province</td>
<td>X/✔</td>
<td>- Business tourists are less likely than leisure travellers to move around the country&lt;br&gt;- However, a coordinating body could ensure more equitable spread of events, especially with facilities opening in Bloemfontein and elsewhere</td>
</tr>
<tr>
<td>Distribution by Season</td>
<td>✔</td>
<td>- The <strong>meetings market</strong> in particular is attractive from a seasonal distribution perspective, since there is an <strong>opportunity to influence time of arrival</strong> by targeting meetings that are scheduled for off-peak periods</td>
</tr>
<tr>
<td>Transformation</td>
<td>✔</td>
<td>- <strong>Business Tourism Associations</strong> are actively promoting transformation principles and encouraging members to meet regulations&lt;br&gt;- The business tourism sector provides an excellent opportunity for previously disadvantaged enterprises to play a role in the <strong>provision of services to them across the value chain</strong></td>
</tr>
</tbody>
</table>
Globally, the business tourism markets are large and attractive

**Global Tourism Outbound 2005**

- Exhibitions: N/A
- Incentives: 4
- Association / Government Meetings: 7
- Corporate Meetings: 25
- Long-Haul Leisure: 105

**Global Tourism Market Size 2005**

- Exhibitions: N/A
- Incentives: 58.9 (9.8)
- Association / Government Meetings: 94.9 (15.8)
- Corporate Meetings: 452.1 (75.0)
- Long-Haul Leisure: 863 (144)

**Note:** See Appendix for methodology, Corporate meetings, average 127 participants, 197,000 meetings annually

**Source:** South African Departure Survey 2005, WTO, EIS Study, Convention Industry Council, ICCA, UIA, Vienna Convention Bureau, Sydney Convention and Visitor Bureau, Tourism Vancouver, European Travel Commission, Monitor analysis
But business tourism arrivals are relatively small to South Africa

<table>
<thead>

<td>N/A</td>
</tr>
</tbody>
</table>

- A large market with over 70 exhibitions in South Africa every year and over 1.5 million attendees
- However, they tend to be mostly for a domestic audience
- Moreover, there is a limited impact on many of SAT’s goals
- Better data on foreign visitors to exhibitions is needed before SAT should invest in this market

### Incentives

<table>
<thead>
<tr>
<th></th>
<th>Global</th>
<th>South Africa*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Travellers (mn)</td>
<td>3</td>
<td>4</td>
</tr>
<tr>

<td>86</td>
<td>59</td>
</tr>
<tr>
<td>US$ Bn</td>
<td>8.3</td>
<td>9.8</td>
</tr>
</tbody>
</table>

- High spend per trip
- Contributes to SAT’s goals
- However, strong overlap with leisure tourism and with meetings
- Smallest market of the Business Tourism constituents
- Better data on visitor numbers is needed before SAT should invest heavily in this market

### Meetings

<table>
<thead>
<tr>
<th></th>
<th>Global</th>
<th>South Africa*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Travellers (mn)</td>
<td>12</td>
<td>20</td>
</tr>
<tr>
<td>Rands Bn</td>
<td>297</td>
<td>317</td>
</tr>
<tr>
<td>US$ Bn</td>
<td>28.6</td>
<td>53</td>
</tr>
</tbody>
</table>

- Large market
- Contributes to SAT’s goals, particularly improving seasonality
- South Africa is well positioned to serve this market with world class facilities
- Although recently slipping down ICCA rankings, South Africa has a strong competitive position, and on a number of delegates hosted basis, its ranking is actually improving

Do not appear attractive at present – need more information from industry before they become a focus for SAT

Meet SAT’s goals, large and attractive market

* Estimates based on SAT departure surveys and Monitor analysis
Source: South African Departure Survey 2005, Monitor Analysis

The meetings market can be divided into three organisational types

<table>
<thead>
<tr>
<th>Inter-Governmental Meetings</th>
<th>Corporate Meetings</th>
<th>Association / NGO and Academic Meetings</th>
</tr>
</thead>
<tbody>
<tr>
<td>● Meetings of representatives of governments and government institutions</td>
<td>● Business-related meetings of private companies, sometimes including customers, suppliers and other external role-players</td>
<td>● Meetings of professional associations, industry associations, non-governmental organisations and academic groups</td>
</tr>
<tr>
<td>● Usually within multi-lateral or regional organisations / institutions, to negotiate relationships, set regional policy on key issues or set regional investment agendas</td>
<td>● Sometimes include other corporate events such as exhibitions and product launches</td>
<td>● Exchange information, network with other professionals</td>
</tr>
<tr>
<td>● IGO meetings can be segmented into regional, international and large international meetings</td>
<td></td>
<td>● Learn and develop their subject areas</td>
</tr>
<tr>
<td></td>
<td></td>
<td>● Association meetings can be separated into Small, Medium and Large categories</td>
</tr>
</tbody>
</table>
Inter-Governmental meetings appear attractive but may have risks

- Regional and Continental meetings with synergies in areas of local expertise and policy focus could boost South Africa’s profile as a leader in SADC and Africa
  - Continental policy leadership
    - Trade negotiations
    - African development
    - Poverty alleviation
    - International relations
  - Leading in SADC policy areas
    - Food, Agriculture and Natural Resources (FANR)
    - Trade, Industry, Finance and Investment (TIFI)
    - Infrastructure and Services (I&S)
    - Social and Human Development and Special Programmes / SHD&SP
    - HIV and AIDS Programme

- The large number of international organisations to which South Africa belongs (over 50 IGOs and 17 environmental treaties) gives plenty of opportunity to attract international meetings
  - These meetings are attractive as in general, they have to rotate between member countries and delegates usually pay for themselves
  - Moreover, they behave like Association Meetings with clear synergies in targeting and promotion

- Large inter-governmental summit meetings with Head-of-State involvement (such as WSSD) have the potential to generate significant positive benefits for South Africa
  - Significant foreign earnings and job creation
  - Positive press coverage

- However, this must be managed against some of the negative aspects
  - Potentially damaging negative publicity or problems with brand
Corporate meetings are small, volatile in demand and short lead times

<table>
<thead>
<tr>
<th>Contribution to Tourism’s Goals</th>
<th>Drawbacks</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Volume</strong></td>
<td><strong>The average global size of a Corporate meeting is 127 participants compared to 650 for an association meeting</strong></td>
</tr>
<tr>
<td></td>
<td>– This makes corporate meetings more expensive to acquire per-delegate</td>
</tr>
<tr>
<td><strong>Spend</strong></td>
<td><strong>Corporate meetings are highly subject to economic conditions — one of the first things to be cut during economic downturn is corporate travel budgets</strong></td>
</tr>
<tr>
<td></td>
<td><strong>Lead times for Corporate meetings (6–8 months) are typically much shorter than for association meetings (3–5 years), causing uncertainty in the meeting pipeline and posing challenges to meeting organiser</strong></td>
</tr>
<tr>
<td><strong>Length of Stay</strong></td>
<td><strong>Average lead time for a Corporate meeting (weeks)</strong></td>
</tr>
<tr>
<td></td>
<td>Average # of participants</td>
</tr>
<tr>
<td></td>
<td>Cost to acquire per delegate</td>
</tr>
<tr>
<td></td>
<td>Cost to acquire per delegate</td>
</tr>
<tr>
<td><strong>Distribution by Province</strong></td>
<td><strong>Distribution</strong></td>
</tr>
<tr>
<td><strong>Distribution by Season</strong></td>
<td><strong>Meeting Space</strong></td>
</tr>
</tbody>
</table>

- Corporate meetings represent over 95% of meetings in South Africa, bringing in an estimated 150,000 arrivals per year
- Global spend per delegate: Corporate $3,001, Association $2,150, Incentive $2,510
- Spend per delegate is high
- The length of stay for Corporate meetings is shorter than for other meetings and offers less opportunity for pre- and post-tours
- Owing to the small size of Corporate meeting, corporate meetings are not confined to large cities or conference centres
- Corporate meetings occur year round and school holidays make off-peak months more attractive

1 MPI — Future watch 2006—“A comparative outlook on the global business of meetings ”, Monitor Analysis, SAT, ICCA

Copyright © 2008 South African Tourism
Association meetings have advantages over both

- Rotation policies for many associations make them an easier target to attract to South Africa
  - Potential for repeat business

- High potential for repeat leisure travel

- Stable business
  - Most associations are required to have meetings under their constitutions
  - Meetings tend to be organised 3–5 years in advance, giving a clear view of the pipeline of up and coming meetings to conference organisers and event venues

- Pre- and Post- tours are more likely to be purchased by association meeting participants than by corporate or government meeting participants
  - It is not uncommon for association participants to bring a travel partner
Each has cost / benefits, with associations the most favourable

*Inter-governmental meetings are typically expensive to host, but they have potential spin-off benefits due to their high profile and the public status of their delegates*

### Comparison of Meeting Segments by Cost and Benefit

#### Benefits
- Volume
- Geographic spread
- Spend
- Seasonality
- Length of stay
- Cost to acquire
- Growth

#### Costs
- Cost to city / country of hosting event:
  - Security costs
  - Management
  - Co-ordination
  - Delegate expenses

---

Source: Monitor Conference Survey 2001, Supplier Interviews, PCO Interviews, ICCA, UIA, Monitor Analysis

We have developed databases to target attractive associations

Opportunities in the “High Priority” and “Low Hanging Fruit” segments for associations should be pursued aggressively through local reps and head offices.

<table>
<thead>
<tr>
<th>Medium-Long Term Investment</th>
</tr>
</thead>
</table>

**Characteristics**
- Large, greater than 2 days duration and typically happen in arrivals troughs
- However, may have been to SA recently or there is no SA representative of the association

**Actions**
- **Build and maintain relationships** with SA representatives to keep South Africa on the radar screen
- Provide support to SA representatives to be active members of the association (“ambassador program”)
- Continue to develop local associations database to “fill in blanks”

<table>
<thead>
<tr>
<th>Most Attractive</th>
</tr>
</thead>
</table>

**High Priority**

**Characteristics**
- Large, greater than 2 days duration and typically happen in arrivals troughs
- South African membership and SAT presence in host country
- South Africa possible option in short to medium term

**Actions**
- **Aggressively pursue opportunities**
  - Contact local representative and suggest hosting
  - Contact headquarters
  - Liaise with CVBs / ICCs to begin bid process

<table>
<thead>
<tr>
<th>Low Priority</th>
</tr>
</thead>
</table>

**Characteristics**
- Small, short meetings in peak arrivals months
- No SA representatives of the association and no SAT presence in host country

**Actions**
- **Do not invest resources** in trying to attract these meetings
- However, track developments to see if they move into other quadrants (increased meeting size, appointment of South African representatives etc.)
- Continue to develop local associations database to “fill in blanks”

<table>
<thead>
<tr>
<th>Low Hanging Fruit</th>
</tr>
</thead>
</table>

**Characteristics**
- Small, short meetings in peak arrivals months
- However, South African Representation and SAT presence in host country
- South Africa possible option in short to medium term

**Actions**
- **Pursue opportunities**
  - Contact local representative and suggest hosting
  - Contact headquarters
  - Liaise with CVBs / ICCs to begin bid process
Executive Summary:
A clear set of choices has been made to meet these objectives

What are our goals and aspirations?
- To help meet the 6 key goals of SAT
  - Increase in tourist volume
  - Increase in tourist spend
  - Increase length of stay
  - Improve geographic spread
  - Improve seasonality patterns
  - Promote transformation
- To be amongst the top ten global conference destinations by 2010

Where will we play?
- Concentrate on the association and IGO meetings markets
  - Medium and Large Association Meetings
  - Medium and Large IGO’s
  - Aim to host one large International head-of-state meeting every three years
  - We have identified actual targets
- Use regional tourism offices to target corporations based in their areas
- De-prioritise exhibitions until more data is available
- Use incentives as a way to draw in corporate meetings

How will we win in chosen markets?
- Use and develop existing consumer understanding
  - Share this information with trade
- Regularly conduct competitor research to revise choices and develop differentiated messaging
- Use prioritisation matrices to target most promising leads in the association and IGO markets
- Use the World Cup as a lever to raise South Africa’s world ranking
  - However, be careful to manage capacity around 2010 to prevent a major fall-off in the following years

What capabilities must be in place to win?
- Greater co-operation between government and industry
  - Consider industry advisory board for SAT
- Ambassador programs to raise the profile of South African in target associations
- Bid support fund to cover costs of local organising committees
- Definition of standards and establishment of accreditation scheme through trade associations
- Clearly defined metrics and implementation plans

Contributing to Tourism’s 6 key objectives is certainly achievable
However, attaining Top 10 conference destination status by 2010 will be a significant challenge
## Integrated SA Tourism Portfolio 2008 – 2010: Underscored are leisure and business tourism markets (* = associations and # = incentives and corporate meetings)

5. Review of 2002-2006 100
6. Conclusion 106
4. Events: The 2010 Soccer World Cup opens up new area of marketing

To take this opportunity forward SA Tourism has established an events unit to target and help the relevant organisations to bid for major global events to raise the profile of South Africa.

In its bid to host the Soccer World Cup in 2010, South Africa highlighted the key objectives for the event as:

- Hosting a world-class African World Cup
- Ensuring a lasting social legacy through the event
- Leveraging the event to spread economic and social benefits beyond the borders of South Africa
Events such as 2010 are in line with the broader objectives for tourism

**Key Objectives of the Tourism Organising Plan**

- Contribute towards hosting a successful FIFA* World Cup™ in 2010
- Maximise tourism value from the event
- Enable other African countries to benefit from the event
- Maximise the opportunity to brand South Africa as a tourism destination
- Have a positive impact on social legacy through advancing the tourism competitiveness agenda to support objectives of creating jobs, growth and equity

* FIFA – Fédération Internationale de Football Association
Strategic Interventions of what SA Tourism does and what it facilitates

**Core Interventions: WHAT SAT DOES**
- Strategic Focus on Events
  - Event criteria & selection
  - Awareness of support offered
  - Leverage opportunities
- Info Manage
  - Strategic Research
  - Calendar of Events
  - Communication Platforms
- Marketing Branding
  - Media Leverage
  - Brand Leverage
  - PR / Communication Campaigns

**Non-Core Interventions: WHAT SAT FACILITATES**
- Graded Accom.
- Support Tourism Grading Council
- Support Fedhasa/NAA/TBCSA
- Facilitate Interactions
- Improve Transport Safety
- Support SATSA / ASATA / TBCSA
- Support implementation of Plan
- Facilitate Interactions
- Skills & Service Levels
- Support Theta
- Support Events Industry
- Facilitate Interactions
It is also a huge opportunity for positioning SA on global TV platforms

The number of TV viewers in 2010 will probably be higher than in 2002 since South Africa is in the same time zone as most soccer loving countries

Total number of TV viewers** per FIFA World Cup, 1986-2002

<table>
<thead>
<tr>
<th>Year</th>
<th>Number of Viewers (billion)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mexico - 1986</td>
<td>13.5</td>
</tr>
<tr>
<td>Italy - 1990</td>
<td>26.7</td>
</tr>
<tr>
<td>USA - 1994</td>
<td>32.1</td>
</tr>
<tr>
<td>France - 1998</td>
<td>33.4</td>
</tr>
<tr>
<td>Japan/Korea - 2002</td>
<td>28.8</td>
</tr>
</tbody>
</table>

** The number of viewers is cumulative as it counts the number of viewers over the number of days the event was hosted. There is therefore double-counting.

Japan / Korea - 2002

- TV coverage in more than 210 countries
- 1.1 billion people watched the final in Korea
- More women (mainly in Asia) watched the matches than in previous world cups
- Out of home viewing and big screen viewing increased significantly

* According to FIFA, viewership for France 98 was over weighted because of the auditing methods used in China, where viewership figures were based on rankings in Shanghai which were then multiplied by a factor to estimate the audience for the entire country.

Likely to participate in the 2010 WC

Source: SAT Tourism Portfolio 2005-2009, fifa.com as of 30.09.05
To achieve the 2010 tourism objectives we need to capitalise on opportunities presented by the World Cup and address key tourism challenges.

**Position South Africa to Achieve its Tourism mandate and broader 2010 Objectives**

**Broader objectives of 2010 Event**
- World class African World Cup
- Lasting social legacy
- Spread benefit to continent

**Mandate for Tourism**
- Sustainable GDP growth
- Sustainable job creation
- Redistribution and Transformation

**Objectives of the 2010 Tourism Plan**
- Contribute to a successful event
- Maximise tourism value from event
- Enable other African countries to benefit

- Brand SA as a tourism destination
- Advance the tourism competitiveness agenda

**Capitalising on 2010 Arrivals and Exposure**

**Addressing Key Tourism Challenges To Deliver the Experience**

- Information and Transactional Fulfilment
- Marketing and Branding
- Accommodation
- Tourism-friendly Transport and Tourist Safety & Security
- Skills and Service Levels
- Events and Attractions

...by...

...through coordinated interventions within each functional area.
**Executive summary of Events Project on 2010**

### The 2010 Opportunity
- The event presents a platform to help South Africa achieve its tourism mandate and objectives.
- By taking advantage of opportunities to:
  - Maximise value *during* the event
  - Maximise value *after* the event
- About R11 billion in tourism revenue could be generated during the event.

### Key challenges for tourism around 2010
- Poor access to channels and tourism information
- Insufficient accommodation
- Insufficient compelling attractions & activities
- Inadequate service levels and skills shortage
- Inadequate public transport
- Insufficient focus on tourist safety & security
- Limited institutional capacity
- Managing expectations
- Demand management
- Displacement of general tourists around the event

### Key tourism-related initiatives
- Initiatives have been grouped into specific functional areas to facilitate the implementation process:
  - Information
  - Marketing and Branding
  - Tourism-friendly transport and tourist safety & security
  - Accommodation
  - Events and attractions
  - Skills and service levels

### Making it happen
- Obtain buy-in and sign-off of the plan from the Minister
- A tourism 2010 unit is to be set-up within SAT, reporting to the CEO, for:
  - Planning, Management & Monitoring
  - Co-ordination of Initiatives
  - Stakeholder Management
- Inter-governmental coordination in respect of tourism through DEAT and the TCC.
Action Plans for the Events Marketing strategy

2010 Action Plan

- Research & Info Management
- Leverage media opportunities from 2010 related events
- Positive messaging opportunities from key national & international events

Review: 2002-2005/6

Part of the development of the TGS was a set of predictions on what the possible outcome would be of a successful implementation of the strategy. The re-balancing of the portfolio has achieved important success with a better spread of volume across markets than in 2001. The process of re-balancing is subject to all the fluctuations of global tourism and is hard to predict and hold on course.

But the critical knowledge we have now is which markets we can indeed growth (i.e. recruit first time visitors) and where we need to defend and get repeat visitors to come more often for find new reasons for them to visit. Furthermore we understand which markets we need to look if one regional market goes into decline or collapses.

Arrivals and revenue growth were weak in 2001 when the TGS process started. At the end of the first year, we modelled what scenario we were looking at if we carried on marketing the country the same way (i.e. no focus and putting money across the globe in regional hubs) and what the potential growth rates could be achieved up to 2005 if we became more focused and differentiated in our marketing efforts.

It is important to note that this modelling was done before the dramatic events of tourism in the past four years and was largely based on mathematical regressions. Therefore the huge events of 9/11, the Gulf War, the Iraq War, SARS and the South East Asian tsunami of 2004 were not factored in. All these factors have led to a decline in the volume of global travel from some markets since 2001 and which only started to rebound in 2004.
We have achieved the volume and value growth

Potential growth in arrivals and revenue was modelled in 2001 using the best available data at the time. Good advances have been made towards the targeted growth rates.

| Potential (‘01-’05)| 5.9%            |

Potential 2005 Arrivals: 7,273,900

Review of Phase One: 2002-2004

At the end of 2004 the data suggests that we had made important strides towards realizing our growth potential. The arrivals growth has been closer to the target than value as the years 2003 and 2004 saw a decline of revenue from some markets as the Rand continued to strengthen against the US dollar. Like many of our competitors, foreign tourists continued to arrive but they just spent less on their visit.

An evaluation of the sources of growth since 2001 has confirmed both the wisdom of the portfolio choices, and the impact of targeted marketing action.

The first portfolio was a larger set of countries and represented the first phase of SAT moving from an organisation that marketed to the world to a more focused marketing organisation aware of where the bigger and best opportunities sat.

Most of the growth that we have seen since 2001 has been in the core portfolio, which suggests that we are getting the returns on our increasingly focused efforts:
Most of the Volume Growth between 2002-2004 came from the Portfolio markets

Conclusion

The Tourism Growth Strategy is the result of sustained investment and learning over the period 2001 to 2005. Through the process an accurate picture of the opportunities and challenges has been brought into stark relief. The size of the potential prize in our focus markets is so compellingly large (and larger than in anywhere else), that the logic speaks for itself.

The following figure provides a graphic illustration of the measurable opportunity available to South Africa in target market segments in eleven key markets where we have developed detailed consumer segmentations.

SAT hopes that industry will be inspired to align its own strategies with these choices. There’s money to be made in these focus areas, and the returns on our collective investment will multiply as we align our resources against a common vision for growth of tourism, employment and our country.

We encourage stakeholders to engage with the detail of both the detailed country-level marketing strategies as well as the Global Competitiveness programme. Effective marketing creates the demand, but we need to also deliver on the promise. The GCP guides our actions and investments behind the brand and the growing demand for South Africa.
But marketing alone cannot deliver results — key constraints and barriers on delivery need to be removed

- SAT cannot afford representation in all markets which are important, but SA needs to maintain some marketing presence through other players (for example foreign missions)

- The new strategy requires that in our product and services we begin to do things differently from the past - and keep ahead of the competition
- Focus on tourism safety and quality strategies

- In certain key markets - particularly Africa and Asia - our immigration and visa procedures represent a major constraint

- At certain times of the year, and in certain markets, the availability of airline seats is lower than would support growing demand. This combined with channel economic issues drives up the cost of holidays to SA compared to our competitors
The Theory of Travel Evolution: Markets are at different stages of development and therefore need specific strategies to activate

* The duration of the four phases of the life cycle may vary significantly; their graphical representation with equal distances may thus be misleading. Note: Framework based on Michael Porter: Competitive Strategy, 1980, Chapter 8 (Industry Evolution)
The tourism industry in South Africa appears to be in a rapid growth phase

The doubling of tour operator numbers in the past five years, expansion in hotel rooms and rapid expansion in non-hotel accommodation as well as product proliferation generally are indicative of the current growth phase of the tourism industry.

Tourism Product Life Cycle

<td></td>
</tr>
</tbody>
</table>

Profile of a high growth industry:
- Rapid entry by new players and over-capitalisation / excess capacity
- Emergence of consolidating forces in order to control pricing and capacity
- More 'competition' than 'coopetition' and weak relationships within the industry
- Lack of industry-specific / institutionalised information

* The duration of the four phases of the life cycle may vary significantly; their graphical representation with equal distances may thus be misleading.

Note: Framework based on Michael Porter: Competitive Strategy, 1980, Chapter 8 (Industry Evolution)
Strategic alignment in the sector is one of the biggest challenges ahead and one of the biggest barriers to growth

*Sustainable competitiveness is not an accident - it is created through the deliberate development of the context within which firms both compete and co-operate*
SA Tourism is responsible for branding and creating awareness - tourism service providers are responsible for the experience delivery.

Awareness and desire

- Awareness created by SAT marketing campaigns
- SAT Portfolio: Core and Tactical Markets
- Channels: Tour operators, Internet, etc
- Transport: Airline, rail, car, ship
